About Senco Sensors Inc.

Senco Sensors is a high-tech manufacturer/wholesaler of carbon monoxide (CO) alarms that incorporate proprietary, patented electrochemical sensor technology.

The Senco Supreme CO alarm, as featured in the infomercial, provides the very best in carbon monoxide sensing technology differentiating itself from others on the market by offering reliable CO detection at levels as low as 30 ppm and alarm points as low as 40 ppm with the accuracy of higher-cost industrial sensors. It features state-of-the-art electrochemical sensor technology, high and low level alarm points, digital display with easy to read action icons, an audible alarm, and Senco's unique manual test mode which allows the consumer to instantly test the detector with a known source of CO.

Carbon Monoxide is the most common and deadly poison in our homes today, and it affects the most vulnerable members of the family first. It is a colorless, odorless, tasteless and often deadly gas, which can be produced by any fuel-burning appliance in the home. It is the cause of some 10,000 cases of accidental poisoning, as well as several hundred deaths each year in North America alone.
