**SENCO ANNOUNCES DISTRIBUTION AGREEMENT WITH
THOMAS GLOVER OF THE UNITED KINGDOM**

VANCOUVER – Senco Sensors Inc. is pleased to announce that it has signed a distribution agreement with Thomas Glover and Company for the United Kingdom.

The distribution agreement will give Thomas Glover and Company exclusive rights to distribute for trade or business to business accounts such as, systems manufacturers and installers, insurance companies, etc. As the UK is one of the fastest growing markets for CO alarm sales, the Company is confident that this alliance with Thomas Glover will be of great mutual benefit.

Senco is working with Thomas Glover to develop a 12V unit to be used in security systems through their trade contacts. The Company is also currently working towards receiving BSI certification which would allow the Senco Model to bear the Kitemark logo. The Senco Model One currently meets the requirements of the British Standard for carbon monoxide alarms BS 7860 (1996) and bears the CE mark, which is a quality control symbol recognized throughout Europe.

Thomas Glover and Company is a UK fire safety and alarm company with a 100 year history and an established brand name within the industry. Thomas Glover is wholly owned by Chubb Fire who is the UK's biggest fire and security organization with a turnover in excess of £400M. Chubb Fire has unequalled industry knowledge and resources and has pioneered many of today's fire safety advances.

About Senco Sensors Inc.

Senco Sensors is a high-tech manufacturer/wholesaler of carbon monoxide (CO) alarms that incorporate proprietary, patented electrochemical sensor technology.

The Model One CO alarm provides the very best in carbon monoxide sensing technology differentiating itself from others on the market by offering reliable CO detection at levels as low as 30 ppm and alarm points as low as 40 ppm with the accuracy of higher-cost industrial sensors. It features state-of-the-art electrochemical sensor technology, high and low level alarm points, digital display with easy to read action icons, an audible alarm, and Senco's unique manual test mode which allows the consumer to instantly test the detector with a known source of CO.

Carbon Monoxide is the most common and deadly poison in our homes today, and it affects the most vulnerable members of the family first. It is a colorless, odorless, tasteless and often deadly gas, which can be produced by any fuel-burning appliance in the home. It is the cause of some 10,000 cases of accidental poisoning, as well as several hundred deaths each year in North America alone.

ON BEHALF OF THE BOARD
