**Form 51-102F3**
*Material Change Report*

**Item 1 Name and Address of Company**

Oromin Explorations Ltd.
Suite 2000, 1055 West Hastings Street
Vancouver, B.C.
V6E 2E9

**Item 2 Date of Material Change**

November 20, 2009

**Item 3 News Release**

The news release was disseminated on November 20, 2009 by Stockwatch, Marketnews and Marketwire.

**Item 4 Summary of Material Change**

The Company announced that it is retracting references to a global mineral inventory that was contained in news releases dated September 9, 2009 and October 19, 2009 and material change reports dated September 15, 2009 and October 21, 2009 as this disclosure is not permitted by National Instrument 43-101 *Standards of Disclosure for Mineral Projects*.

**Item 5 Full Description of Material Change**

See attached news release.

**Item 6 Reliance on subsection 7.1(2) of National Instrument 51-102**

Not Applicable

**Item 7 Omitted Information**

None

**Item 8 Executive Officer**

The following executive officer of the Company is knowledgeable about the material change and may be contacted regarding the change:

James Stewart
Secretary

Telephone: 604.331.8772
Facsimile: 604.331.8773

**Item 9 Date of Report**

November 20, 2009

**OROMIN**
**EXPLORATIONS LTD.**
Suite 2000, Guinness Tower, 1055 West Hastings Street, Vancouver, B.C. Canada V6E 2E9
**Tel**: (604) 331-8772 **Toll-free** (877) 529-8475
**Fax**: (604) 331-8773 **E-mail**: info@oromin.com

## CLARIFICATION OF SABODALA MINERAL RESOURCES

In its news releases dated September 9, 2009 and October 19, 2009 and material change reports dated September 15, 2009 and October 21, 2009, Oromin Explorations Ltd. ("Oromin") reported that its Sabodala Property contained a global mineral inventory of almost 3 million ounces of gold.

This disclosure is not permitted by NI 43-101 and Oromin hereby retracts reference to the global mineral inventory. As previously disclosed, the following estimated indicated and inferred mineral resources were contained within the global mineral inventory:

| **Higher Grade Au Deposits** | | **Indicated Mineral Resource Estimate** | | |
|---|---|---|---|---|
| Deposit | Cut-off Grade (Au g/t) | Tonnes | Grade (Au g/t) | Contained Au (oz) |
| Golouma West | 0.5 | 6,100,000 | 2.60 | 505,000 |
| Golouma South | 0.5 | 2,220,000 | 4.20 | 297,000 |
| Kerekounda | 1.0 | 744,000 | 6.90 | 164,000 |
| **Total Indicated Mineral Resource Estimate** | | **9,064,000** | **3.34** | **966,000** |
| | | **Inferred Mineral Resource Estimate** | | |
| Golouma West | 0.5 | 502,000 | 3.00 | 48,000 |
| Golouma South | 0.5 | 13,000 | 3.50 | 1,000 |
| Kerekounda | 1.0 | 244,000 | 6.10 | 48,000 |
| **Total Inferred Mineral Resource Estimate** | | **759,000** | **4.01** | **97,000** |

| **Lower Grade Au Deposits** | | **Indicated Mineral Resource Estimate** | | |
|---|---|---|---|---|
| Deposit | Cut-off Grade (Au g/t) | Tonnes | Grade (Au g/t) | Contained Au (oz) |
| Masato | 0.5 | 32,800,000 | 1.20 | 1,220,000 |
| | 1.0 | 15,900,000 | 1.60 | 810,000 |
| Niakafiri SE | 0 | 0 | 0.00 | 0 |
| Maki Medina | 0 | 0 | 0.00 | 0 |
| **Total Indicated Mineral Resource Estimate @ 0.5 COG** | | **32,800,000** | **1.20** | **1,220,000** |
| | | **Inferred Mineral Resource Estimate** | | |
| Masato | 0.5 | 1,535,000 | 1.40 | 71,000 |
| | 1.0 | 1,000,000 | 1.90 | 60,000 |
| Niakafiri SE | 0.5 | 4,350,000 | 0.90 | 119,000 |
| Maki Medina | 0.5 | 1,500,000 | 1.50 | 70,000 |
| **Total Inferred Mineral Resource Estimate @ 0.5 COG** | | **7,385,000** | **1.13** | **260,000** |

The balance of the ounces reported in the global mineral inventory reported by SRK Consulting are not considered to be indicated or inferred mineral resources as it is not known at this time whether such material has a reasonable prospect for economic extraction.

The foregoing resource estimate was calculated by SRK Consulting based on drilling up to May 2009 which included diamond core holes up to DH-475 and reverse circulation holes up to RC-625. Since that date, Oromin has completed an additional 125 diamond core holes and a further 30 reverse circulation holes. The objective of the bulk of these 155 new drill holes is to add additional resources and upgrade current resources at the Kerekounda, Golouma West, Golouma South and Epsilon deposits, all of which are categorized as higher grade gold deposits.

A revised and updated resource estimate is scheduled for completion in the second quarter of 2010 and will incorporate these new drilling results as well as additional drilling completed by the end of the first quarter of 2010.

On behalf of the Board of Directors of
**OROMIN EXPLORATIONS LTD.**
