Securities Act

MATERIAL CHANGE REPORT UNDER SECTION 75(2) OF THE ACT

1. **Reporting Issuer**

   Millstream Mines Ltd.
   Suite 1320
   4 King Street
   Toronto, Ontario
   M5H 1B6

2. **Date of Material Change**

   May 30, 2007

3. **Press Release**

   CCN Matthews – May 30, 2007

4. **Summary of Material Change**

   Millstream mobilizes drillers to Airport East Property drilling continues at Potter Mine Property

5. **Full Description of Material Change**

   Please refer to attached press release

6. **Reliance on Section 75(3) of the Act**

   This report is not being filed on a confidential basis in reliance on Section 75(3)

7. **Omitted Information**

   N/A

8. **Senior Officer**

   Ronald Haller
   (416) 363- 1240

9. **Statement of Senior Officer**

   The foregoing accurately discloses the material change referred to herein.

DATED at Toronto this 30th day of May, 2007

MILLSTREAM MOBILIZES DRILLERS TO AIRPORT EAST PROPERTY; DRILLING CONTINUES AT POTTER

Toronto, Ontario, Millstream Mines Ltd. (MLM-TSX-V; NJD- Frankfurt) is pleased to report that it has secured the services of Roncor Drilling in order to drill test 2 significant anomalies discovered on the Airport East Property's claims. Concurrently, the drill program at the Potter Mine Property remains ongoing.

One of the sites targeted is in the vicinity of a past copper geochemical anomaly over which an airborne E.M. was flown in the late 1980's detecting strong conductors. In the spring of 2006, known excavated trenches were visited and a representative sample from the blasted rock was taken by the Company's consultant Phil A. Brown, P. Geo., QP per NI 43-101 for the property (See PR May 17, 2006). The sample was later sent to Swastika Laboratories Ltd. for assay and returned values of 3.977 g/tonne gold, 0.86% copper along with detectable amounts of nickel and platinum.

The second site to be tested is in the vicinity of a gravity anomaly picked up by ground geophysical IP (induced polarization) surveys conducted in 2003 by Insight Geophysics (see PR Aug. 27, 2003). The location of the target is near to the western boundary of the Airport East claims.

The Airport East Property is located in the Falconbridge and Street Townships, Sudbury Mining District, Northern Ontario, Canada. It consists of 127 mining claim units which abut the east boundary of the Company's Airport Property. Millstream retains a 100% undivided interest in the Airport East Property.

Millstream continues drilling to further explore its potentially rich volcanogenic massive sulphide (VMS) type deposit at its Potter Property. The past producing property is host to copper-zinc-cobalt "stacked" mineralized zones located in the highly prolific Abitibi Greenstone Belt in the Kidd-Munro Assemblage near the town of Matheson in north eastern Ontario, Canada.

The principle objective of Millstream Mines Ltd. is to enhance and develop known mineral properties to production potential.

Millstream seeks safe harbour with regards to forward looking statements.
