ALDEVER OPTIONS HARRIS CREEK GOLD PROJECT, VANCOUVER ISLAND

May 5, 2017

Aldever Resources Inc. (ALD—TSXV) (ALDVF—OTCQB) (17G1—Frankfurt) (“Aldever” or the “Company”) is pleased to announce that it has entered into an agreement with an arms’-length vendor to acquire a 100% interest in the Harris Creek Gold Project, which covers an area of ~426 hectares in the Victoria mining division, south Vancouver Island. The project hosts the “All the Marbles 2” occurrence, located east of Lens Creek, approximately 2.3 kilometers west of Maid Lake. The area is underlain by diorite and quartz diorite of the Mesozoic and/or Paleozoic Westcoast Crystalline Complex. Seams, 2 to 5 metres wide, of dark green to black serpentinite cut the diorites. Locally, ultramafic rocks (olivine, gabbro and serpentinite) host chalcopyrite mineralization with anomalous copper, gold and silver values. Between 2005 and 2010, Le Baron Prospecting completed programs of geochemical sampling and prospecting on the area as the All the Marbles 1-2 claim. In 2008, rock sampling yielded anomalous silver and copper values from an outcrop of altered olivine (sample B314610). Approximately 180 meters to the south, a sample (B314609) of serpentinite was found to have anomalous gold values (Assessment Report 29292).

Aldever can earn a 100% interest in the Harris Creek Gold Project by issuing to the vendor 500,000 common shares within 5 days of TSX Venture Exchange Approval, paying \$150,000 in 18 months, a further \$150,000 in 36 months and incurring \$1,000,000 in qualifying exploration expenditures over a five-year period. A 1% NSR (Net Smelter Royalty) has been granted to the vendor, of which 0.5% may be purchased by Aldever for \$1,000,000. This transaction is subject to TSX Venture Exchange Approval.
