Kokanee Placer Ltd. has advised CONSOLIDATED GOLDWIN VENTURES INC. (CGW TSX-V) that it is mobilizing a geophysical crew in the next few weeks to conduct specific magnetometer surveying on its two newly acquired diamond properties, the Cleft and ZZL (Newsrelease # 9) and on an additional area on its GSL claims under option from New Shoshoni Ventures Ltd. in the Drybones Bay area of Great Slave Lake in the Northwest Territories, Canada.

The two new properties and the additional area on the original optioned property were identified as being prospective from their topographic features and from the regional airborne government magnetic survey. The responses have never been investigated by detailed airborne or ground surveying and are interesting in the similarity to the areas currently being explored by New Shoshoni Ventures where that company has intersected a new kimberlite pipe.

Initial magnetometer surveying will be completed over all three areas by the geophysical crew working out of Yellowknife. NWT.

The Company also announces the grant of 1,077,500 incentive stock options having an exercise price of $0.10 per share and having an exercise term of 5 years.
