Description of Business

The Company was incorporated in British Columbia under the Company Act of British Columbia on October 2, 1984 as Consolidated Goldwin Ventures Inc. and effectively on April 30, 2012 changed its name to WestKam Gold Corp. The Company's strategy is to identify, acquire, explore and develop precious and base metal deposits amenable to low production costs and high operating margins, focusing on properties with low initial entry costs.

Overall Performance and Outlook

The Company is currently focusing its exploration efforts on the Bonaparte property located in British Columbia, Canada. Although the Company has recorded an impairment loss on the Bonaparte property, management intends to proceed with plans to conduct further exploration on the property with a view to advancing the property with plans for a summer 2021 work program. The Company will also continue to evaluate similar opportunities for base and precious metals projects, focusing on projects in North America.

The outbreak of the coronavirus, also known as "COVID-19", has spread across the globe and is impacting worldwide economic activity. Conditions surrounding the coronavirus continue to rapidly evolve and government authorities have implemented emergency measures to mitigate the spread of the virus. The outbreak and the related mitigation measures may have an adverse impact on global economic conditions as well as on the Company's business activities. The extent to which the coronavirus may impact the Company's business activities will depend on future developments, such as geographic spread of the disease, the duration of the outbreak, travel restrictions, business disruptions, and the effectiveness of actions taken in Canada to contain and treat the disease. These events are highly uncertain and as such, the Company cannot determine their financial impact at this time.

Company Activity

The Company has been on care and maintenance as a result of the COVID-19 pandemic and has completed certain corporate actions during this time. Management is currently planning a summer 2021 exploration program on its Bonaparte property and expects that activities will continue to increase in fiscal 2021.

On November 11, 2020, the Company closed a non-brokered private placement for gross proceeds of \$975,040, issuing 8,125,331 units in connection with the transaction. Each unit consists of one common share and one common share purchase warrant, each warrant exercisable at a price of \$0.20 for a period of 5 years.

Bonaparte Gold Property – Kamloops, British Columbia

In fiscal 2011, the Company acquired a 75% interest in the Bonaparte Gold property located in the Kamloops mining district in British Columbia.

To acquire its 75% interest, the Company paid \$8,001,550, issued 3,250,000 common shares with a value of \$4,750,000, and incurred certain expenditures on the property.

On January 24, 2012 the Company acquired a 100% right to a portion of land adjacent to the Bonaparte property. The rights were received in exchange for settlement of prepaid exploration costs of \$501,627.

In fiscal 2014, the Company entered an option agreement to acquire an additional 17% interest on its existing claims of the Bonaparte Gold property for consideration of 6,500,000 common shares (issued at a value of \$350,000) and payment of \$150,000 in cash (paid).

Additionally, the Company acquired the remaining 8% interest in the Bonaparte Gold property through the issuance of 10,950,000 common shares valued at \$547,500, bringing the Company's interest in the Property to 100% of all claims.

The table below is a summary of exploration expenditures recognized in profit or loss for the periods ended January 31, 2021 and 2020:

Expenses

General and administrative expenses totaled \$98,440 for the three months ended January 31, 2021 compared with \$140,519 in 2020. Details of the largest changes and significant general and administrative items are as follows:

- Consulting expenses increased by \$41,000 to \$41,000 from \$nil as a result of external consultant fees incurred for first nations partner discussions and negotiations, administrative consulting fees charged during the quarter, as well as a non-recurring payment for director fees.
- Investor relations and shareholder information decreased by \$2,340 to \$5,280 from \$7,620 as a result of the discontinuation of market-making services.
- Management fees decreased by \$5,000 to \$40,000 from \$45,000, a result of reduced fees payable to an officer of the company for a leave of absence.
- Office expenses decreased by \$9,001 to \$830 from \$9,831, mainly due to a reduction in expenses for office premises rental.
- Regulatory and filing fees decreased by \$10,393 to \$10,052 from \$20,445 and is attributable to a decrease in costs associated with regulatory filing fees and related corporate actions.

The Company recorded \$nil in interest expense during the quarter ended January 31, 2021 compared to \$5,803 in the same quarter 2020, a result of extinguished repaid notes payable in the prior year.

Exploration Expenses

The Company incurred no exploration and evaluation expenditures for the three months' ended January 31, 2021 compared to \$51,600 in 2020.

New standards, amendments and interpretations not yet effective:

The Company has performed an assessment of new standards issued by the IASB that are not yet effective and has determined that any new standards that have been issued would have no or very minimal impact on the Company's consolidated financial statements.

Financial Instruments and Risk Management

Fair values

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values. The Company classifies the fair value of the financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets;
- Level 2 - inputs to the valuation methodology included quoted prices for identical assets or liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace; and,
- Level 3 - inputs to the valuation methodology are not based on observable market data.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, reclamation bonds, accounts payable and accrued liabilities and notes payable are measured at amortized cost using effective interest rate.

Financial instrument risk exposure and risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of grants due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company considers its current liabilities to be aged as follows:

As at January 31, 2021

	Total	Up to 3 months	3 – 12 months
Accounts payable and accrued liabilities	\$ 506,549	\$ 113,934	\$ 392,615
	<u>\$ 506,549</u>	<u>\$ 113,934</u>	<u>\$ 392,615</u>

As at January 31, 2020

	Total	Up to 3 months	3 – 12 months
Accounts payable and accrued liabilities and notes payable	\$ 1,353,836	\$ 92,550	\$ 1,261,286
	<u>\$ 1,353,836</u>	<u>\$ 92,550</u>	<u>\$ 1,261,286</u>

Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment grade short-term demand deposit certificates issued by its banking institutions. The company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is marginally exposed to interest rate risk. The Company's bank account earns interest income at variable rates and its notes payable carry fixed interest rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates.

Foreign currency risk

The Company has limited exposure to foreign currency risk on currency fluctuations related to monetary items with a settlement currency other than Canadian dollars.

Commodity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.
