Description of Business

The Company was incorporated in British Columbia under the Company Act of British Columbia on October 2, 1984 as Consolidated Goldwin Ventures Inc. and effectively on April 30, 2012 changed its name to WestKam Gold Corp. The Company’s strategy is to identify, acquire, explore and develop precious and base metal deposits amenable to low production costs and high operating margins, focusing on properties with low initial entry costs.

Overall Performance and Outlook

The Company is currently focusing its exploration on the Will property located in the Goldbridge mining camp of British Columbia, Canada. During the quarter ended January 31, 2025, the Company did not undertake any work programs on the Will property due to winter conditions and is currently in the planning stages for a summer 2025 exploration program.

The Company will also continue to evaluate similar opportunities for base and precious metals projects, focusing on projects in North America.

Company Activity

The Company has not undertaken any exploration or other activity due to seasonal weather restrictions. Remediation will commence on its formerly-owned Bonaparte claims when conditions allow for property access, presumably late spring 2025. The Company is also planning its next phase of exploration on the Will property in summer 2025.

Will Property – Goldbridge Mining District, British Columbia

The Company conducted a soil sampling survey in summer 2023, collecting 71 samples for assay. Assay results indicated anomalous gold-in-soil values. Further surveys will be conducted in the 2024 exploration season with a view to delineate potential areas of priority for drilling.

Bonaparte Gold Property – Kamloops, British Columbia

In December 2022, the Company allowed the Bonaparte claims to lapse.

As at January 31, 2025, the Company has issued reclamation bonds of \$100,000 (2024 - \$100,000) for future reclamation work on the Bonaparte Gold property. The Company intends to complete any required reclamation work in 2025 in order to recover the bonds.

As at January 31, 2025, the Company has recognized a reclamation obligation of \$100,000 (2024 - \$41,000). The undiscounted amount of estimated cash flows was estimated at \$100,000. During fiscal 2024, the Company increased the provision by \$59,000 upon contracting the remaining reclamation work.

The table below is a summary of exploration expenditures recognized in profit or loss for the periods ended January 31, 2025 and 2024:

Results of Operations

This review of the Results of Operations should be read in conjunction with the financial statements of the Company for the three months ended January 31, 2025 and 2024.

Revenue and Expense Summary

General and administrative expenses totaled \$23,858 for the three months ended January 31, 2025 compared with \$33,352 in 2024. Details of the largest changes and significant general and administrative items are as follows:

- Consulting fees decreased by \$1,500 to \$nil from \$1,500, due to the termination of a consulting arrangement for administrative services.
- Management fees increased by \$944 to \$22,179 from \$21,235, due to an increase in activity-driven fees by a corporate officer.
- Office expenses decreased by \$4,683 to \$394 from \$5,077, due to a seasonal reduction in general office expenses.
- Professional fees decreased by \$3,250 to \$nil from \$3,250, a result of a reduction attributable to non-audit related service fees from the same period in 2024.
- Regulatory and filing fees increased slightly by \$118 to \$1,214 from \$1,096.
- Travel decreased by \$1,100 to \$nil from \$1,100 due to a decrease in expenses associated with corporate travel for meeting attendance.

Financial Instruments and Risk Management

Fair values

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values. The Company classifies the fair value of the financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets;
- Level 2 - inputs to the valuation methodology included quoted prices for identical assets or liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace; and,
- Level 3 - inputs to the valuation methodology are not based on observable market data, and approximate fair value due to their short term nature.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, reclamation bonds, and accounts payable and accrued liabilities are measured at amortized cost using effective interest rate.

Financial instrument risk exposure and risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of grants due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company considers its current liabilities to be aged as follows:

As at January 31, 2025

	Total	Up to 3 months	3 – 12+ months
Accounts payable and accrued liabilities	\$ 774,950	\$ 29,444	\$ 745,506
	<u>\$ 774,950</u>	<u>\$ 29,444</u>	<u>\$ 745,506</u>

As at January 31, 2024

	Total	Up to 3 months	3 – 12+ months
Accounts payable and accrued liabilities and notes payable	\$ 769,409	\$ 39,289	\$ 730,120
	<u>\$ 769,409</u>	<u>\$ 39,289</u>	<u>\$ 730,120</u>

Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment grade short-term demand deposit certificates issued by its banking institutions. The company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is marginally exposed to interest rate risk. The Company's bank account earns interest income at variable rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates.

Foreign currency risk

The Company has limited exposure to foreign currency risk on currency fluctuations related to monetary items with a settlement currency other than Canadian dollars.

Commodity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.
