

Form 51-102F3
Material Change Report

Item 1 Name and Address of Company

Universal Uranium Ltd.
Suite 600, 595 Howe Street
Vancouver, B.C. V6C 2T5

Item 2 Date of Material Change

March 30, 2006

Item 3 News Release

A News Release was issued in Vancouver, British Columbia on March 30, 2006 and distributed through CNW Newswire.

Item 4 Summary of Material Change

The Company announces that it has awarded a contract for approximately 10,000 line km of helicopter borne radiometrics and magnetics to Fugro Airborne Surveys of Toronto, ON. The 4,963 claims, totaling approximately 124,000 hectares or 1240 sq km, in the Central Mineral Belt (CMB) of Labrador make Universal Uranium the second largest claim holder in the CMB. The properties are being explored jointly under an agreement with Silver Spruce Resources (SSE), of Nova Scotia. Under the terms of the agreement, Universal can earn a 60 per-cent interest in the properties by spending \$2 million on exploration over a three year period. Silver Spruce is the operator during the earn-in period.

An exploration budget of \$ 1 million for the regional exploration has been approved by the Company. This work will consist of data compilation, airborne radiometric / magnetic survey followed by prospecting, and sampling to evaluate targets located by the survey. Gridding, trenching and drilling will follow when targets have been defined. The field work will begin in the spring when weather permits.

Item 5 Full Description of Material Change

Contract Awarded for Airborne Radiometrics / Magnetics

Vancouver, British Columbia, March 30, 2006 – Universal Uranium Ltd. is pleased to announce that it has awarded a contract for approximately 10,000 line km of helicopter borne radiometrics and magnetics to Fugro Airborne Surveys of Toronto, ON. The 4,963 claims, totaling approximately 124,000 hectares or 1240 sq km, in the Central Mineral Belt (CMB) of Labrador make Universal Uranium the second largest claim holder in the CMB. The properties are being explored jointly under an agreement with Silver Spruce Resources (SSE), of Nova Scotia. Under the terms of the agreement, Universal can earn a 60 per-cent interest in the properties by spending \$2 million on exploration over a three year period. Silver Spruce is the operator during the earn-in period.

The properties cover anomalous government uranium in lake sediment values ranging from 10 to 213 ppm against a background of approximately 5 ppm hosted in geological units which are favorable as hosts for uranium deposits. The sample spacing in the survey is approximately 1 sample per 5 square km.

The properties lie along strike and in proximity to properties held by Aurora Energy Inc. (Fronteer/Altius Group), Crosshair Exploration and Mining Corp. and the Santoy/Monster Copper JV. These companies staked known uranium showings and deposits, and then carried out airborne radiometric / magnetic surveys, which resulted in the location of new uranium showings in a number of areas (company press releases – November 05 to January 06). As a result of the exploration results and the rise in price of uranium, the CMB has seen extensive claim staking and exploration over the past couple of years making it the second most active area for uranium exploration in Canada. Targets are: unconformity type uranium deposits related to sedimentary contacts; IOCG type deposits and shear hosted uranium mineralization associated with felsic volcanism, similar to the Michelin deposit of Aurora Energy.

An exploration budget of \$ 1 million for the regional exploration has been approved by Universal. This work will consist of data compilation, airborne radiometric / magnetic survey followed by prospecting, and sampling to evaluate targets located by the survey. Gridding, trenching and drilling will follow when targets have been defined. The field work will begin in the spring when weather permits.

This release has been approved by Peter Dimmell, P.Geo., Vice President of Exploration for Silver Spruce, who is a Qualified Person (QP) as defined in National Instrument 43-101.

Universal Uranium Ltd. is a publicly held Canadian uranium exploration company focused on acquiring, exploring and developing uranium properties located in favorable geo-political climates. The Company is led by a highly skilled, experienced board and management team with significant successes in managing early stage mineral exploration companies.
