FOR IMMEDIATE RELEASE **March 1st, 2004**

SITE PREPARATION UNDERWAY FOR DRILLING AT MANAHUILLA CREEK PROSPECT IN GOLIAD COUNTY, TEXAS

Mr. Bill Wishart, President & CEO of First Star Resources Inc. (TSXV:FRS) is pleased to announce that site preparation is underway for the initial test well at the Manahuilla Creek Prospect in Goliad County, Texas. It is anticipated that a rig will be mobilized to the drill site shortly. First Star owns a 10% Participating Interest to earn a 7.5% Working Interest in the 1,265 acre Manahuilla Creek Prospect located in Goliad County, Texas. A turnkey drilling contract with EDDE DRILLING has been signed and EDDE has confirmed that drilling should commence immediately following completion of their current project, which is expected to be around March 10, 2004. Additionally, we are pleased to report that EDDE is sending a recently constructed, brand new drill rig with their most competent drilling crew, experienced in handling over-pressured drilling and completion programs.

The Manahuilla Creek anomaly is located within the Middle Eocene sands of the expanded Yegua trend of the onshore Gulf Coast Basin. This prolific trend has produced over pressured gas-condensate with total gas production to date exceeding 800 billion cubic feet.

First Star has recently received an engineering and economic evaluation of its 10.00% participating interest and a copy of this report is available on the SEDAR (www.sedar.com). First Star anticipates the cost to earn its 7.5-per-cent working interest in the Manahuilla Creek prospect will be approximately US$100,000 including the anticipated costs to complete the prospective test well.

First Star is an emerging oil and natural gas and resource exploration company. In anticipation of the overall continued strength in global resource markets, First Star is actively pursuing several other opportunities in the resource sector.
