March 30, 2005

Item 3. **Press Release**

The date of the press release issued pursuant to Section 67(1) of the Act with respect to the material change disclosed in this report is **March 30, 2005.** The press release was issued in Vancouver, British Columbia.

Item 4. **Summary of Material Change**

FIRST STAR OPTIONS MINERAL PROPERTIES IN MEXICO

Item 5. **Full Description of Material Change**

Mr. Bill Wishart, President and CEO of First Star Resources Inc. (TSXV: FRS) ("First Star") is pleased to announce the signing of an Option Agreement with MacMillan Gold Corp. (TSXV: MMG) (MacMillan) whereby First Star has the right to earn a 50% working interest in MacMillan's Alpha, Beta and Gamma claims (hereafter collectively known as the Colima Joint Venture Claims) in Colima State, Mexico and any newly acquired claims within a defined area of influence.

First Star will be the operator and may earn a 50% interest in the option properties by funding exploration expenditures of US$1,000,000 and granting up to 1,000,000 common shares of First Star common stock to MacMillan. The cash and shares are due in installment. The first 250,000 shares are to be issued within 10 days of regulatory approval and up to a maximum of 250,000 shares on each of year 1,2 and 3 anniversary of signing the letter of intent. Year 1, 2 and 3 anniversary shares will be capped to a maximum of $100,000, $125,000 and $150,000 in value of shares respectively. First Star is required to have spent US$100,000 by the end of year one, US$300,000 by end of year 2, US$600,000 by end of year 3 and US$1,000,000 by end of year 4. The cost to acquire additional claims within the defined area of influence may be funded from the expenditure commitments. A finders fee of 10% is payable to Al-Munir Kambar in accordance with TSX Venture Exchange policy.

The claims cover two types of targets. The Alpha and Beta claims cover disseminated and veinlet gold systems in skarns and stockworks in metavolcanic rocks. The Gamma claim covers a skarn with copper and disseminated porphyry type copper and silver which was previously developed and mined by Japanese interests (pre WWII). Host rocks are diorite porphyry and siliceous marbles. The claims recently became available after being covered by speculative claims for several years. MacMillan has reviewed historic data, compiled regional geological and mineral occurrence data, and conducted preliminary field observations which led to the acquisition of these claims shortly after they became available. They were selected for their disseminated gold and / or copper potential based on previous work by the Consejo de Recursos Minerales and undocumented mining and prospecting activities by Japanese and Mexican interests.

David Bending, P.Geo., Vice President of Exploration for MacMillan, is a Qualified Person under the meaning of Canadian National Instrument 43-101, is responsible for the technical content of this news release.

Bill Wishart, President and CEO of First Star commented, "Upon an initial review of the historical data which includes extensive sampling and limited drilling, we consider these prospects to offer excellent opportunity for major precious metal and copper discoveries." As part of our evaluation process, First Star will review all available data on the claims and provide a summary report of the properties when completed.
First Star is an emerging mineral, oil and natural gas exploration Company. The company continues to explore other mineral and resource opportunities to add to First Star's portfolio.

For further information please contact Patrick Forseille, P.Geo. at (604) 689-1810 or Bill Wishart at (604) 609-0555 or toll free at 1-877-609-0555.
