

FORM 51-102F3

MATERIAL CHANGE REPORT

Item 1. Name and Address of the Company

Northern Star Mining Corp.
153A Perreault Ave.
Val d'Or, Quebec, J9P 2H1

(the "Issuer")

Item 2. Date of Material Change

March 26, 2008

Item 3. Press Release

The press release was disseminated through the Canada Stockwatch and Market News on March 26, 2008.

Item 4. Summary of Material Change

The Issuer announced further results from its 2007 diamond drill program.

Results are as follows:

HOLE #	From (m)	To (m)	Core length (m)	Grade (g/t Au)	Rock Type
MM-07-94	286.8	293.1	6.3 (21ft)	9.55 (0.28opt)	Gabbro
MM-07-95	149.9	158.7	8.8 (28.9ft)	8.56 (0.25opt)	Gabbro
MM-07-96	140.0	151.6	11.6 (38ft)	2.07 (0.06opt)	Porphyry

**Core lengths are fairly close to true width*

HOLE #	From (m)	To (m)	Core length (m)	Grade (g/t Au)	Rock Type
MH-07-103	176.9	201.6	24.7 (81.1ft)	1.86 (0.054opt)	Porphyry
Including	197.9	198.8	0.9 (2.95ft)	36.20 (1.04opt)	Porphyry
MH-07-107	71.0	97.0	26 (85.3ft)	2.41 (0.07opt)	Porphyry
Including	78.0	82.5	4.5 (14.8ft)	9.40 (0.27opt)	Porphyry

Item 5. Full Description of Material Change

See attached News Releases.

Item 6. Reliance on Subsection 7.1(2) or (3) of National Instrument 51-102

Nothing in this form is required to be maintained on a confidential basis.

Item 7. Omitted Information

Not applicable.

Item 8. Executive Officer

Richard Silas, Corporate Secretary, (ph. (604) 608-1500)

Item 9. Date of Report

March 27, 2008

NORTHERN STAR ANNOUNCES FURTHER DIAMOND DRILL RESULTS

Northern Star Mining Corp. (“Northern Star” or the “Company”; TSX Venture Exchange - NSM): is pleased to announce further results from its 2007 diamond drill program on its wholly owned Malartic-Midway gold project, located 16 kilometers west of Val d’Or, Quebec. Val d’Or is a world renowned gold mining district.

Drilling in 2007 was oriented towards exploration of higher grade gold mineralization within gabbros of the Malartic Goldfields type and lower grade mineralization within porphyries of the Osisko-Canadian Malartic and Agnico-Eagle Goldex types.

Drilling was also oriented to discover and define gold mineralization structures, alteration and rock mechanics in order to plan for and advance underground exploration and development at the Malartic-Midway gold project.

Results are as follows:

HOLE #	From (m)	To (m)	Core length (m)	Grade (g/t Au)	Rock Type
MM-07-94	286.8	293.1	6.3 (21ft)	9.55 (0.28opt)	Gabbro
MM-07-95	149.9	158.7	8.8 (28.9ft)	8.56 (0.25opt)	Gabbro
MM-07-96	140.0	151.6	11.6 (38ft)	2.07 (0.06opt)	Porphyry

**Core lengths are fairly close to true width*

On the Piché-Harvey portion of the project, drilling was oriented towards the discovery of new porphyry type mineralization, for large volume, lower grade type gold mineralization (Osisko-Canadian Malartic, Agnico-Eagle Goldex).

Results are as follows:

HOLE #	From (m)	To (m)	Core length (m)	Grade (g/t Au)	Rock Type
MH-07-103	176.9	201.6	24.7 (81.1ft)	1.86 (0.054opt)	Porphyry
Including	197.9	198.8	0.9 (2.95ft)	36.20 (1.04opt)	Porphyry
MH-07-107	71.0	97.0	26 (85.3ft)	2.41 (0.07opt)	Porphyry
Including	78.0	82.5	4.5 (14.8ft)	9.40 (0.27opt)	Porphyry

“The diamond drill results continue to show the continuity and thickness of gold mineralization on the project. As well, the discovery of new porphyry type gold mineralization on the project adds a new dimension to its potential. The issuance of the *Certificat of Authorization* permitting the construction of the decline (see press release February 27, 2008) along with the contracting of Dumas Contracting Ltd., to carry out the work is very encouraging and exciting, as we can anticipate beginning the underground phase of this project very shortly,” says Michel David, Chairman.

Additional news will be announced as available.

Claude P. Larouche, Geol. Ing. (OIQ) acts as the qualified person of the Company and has reviewed the contents of the news release. The diamond drilling and exploration programs are being carried out under the direct supervision of Claude P. Larouche, Ing. (OIQ). The company is maintaining strict standards for QA (quality assurance) and QC (quality control), by keeping under lock all drill cores, rejects and pulps for further testing. Samples were sent to ALS Chemex labs in Val d'Or, Quebec.

ON BEHALF OF THE BOARD

“Jonathan Awde”

Jonathan Awde Vice President, Corporate Finance
