The news release was disseminated through TSX, BC Securities Commission, Alberta Securities Commission, Market News and Stockwatch.

Summary of Material Change

KENRICH-ESKAY MINING CORPORATION (the “Company”) is pleased to announce that Aeroquest Limited of Milton, Ontario has completed its airborne time domain electromagnetic and magnetic (AeroTEM) surveys at the Coastal Copper Project in the Anyox mining camp south of Stewart, B.C. and the Corey Project in the Eskay Creek mining camp north of Stewart. The company also announces that field crew mobilized to Corey Project on May 24, 2006.

Full Description of Material Change

Vancouver, BC – KENRICH-ESKAY MINING CORPORATION (the “Company”) is pleased to announce that Aeroquest Limited of Milton, Ontario has completed its airborne time domain electromagnetic and magnetic (AeroTEM) surveys at the Coastal Copper Project in the Anyox mining camp south of Stewart, B.C. and the Corey Project in the Eskay Creek mining camp north of Stewart.

Initial survey results for both projects are expected in the next two weeks. The Company’s geologists are standing by to incorporate the data into the first phases of 2006 drilling. Final reports for these surveys are expected to be delivered in late June.

Crews mobilizing to Corey Project

Meanwhile, field crews mobilized to the Corey Project on May 24, 2006.

Drilling is expected to commence in June and will follow-up on the successful 2005 drill programs at the C10 and Cumberland zones. In combination with the expected airborne geophysical results, drilling and geological mapping will target several other highly prospective targets at the Smitty, HSOV and Battlement zones.

The information contained in this document has been reviewed by Paul McGuigan, P.Geo., a Qualified Person as defined by National Instrument 43-101.

On behalf of The Board of Directors of Kenrich-Eskay Mining Corporation.
