Dear Sirs:

Re: Centurion Energy International Inc. - Material Change Report

This letter is intended as a statement setting forth certain matters that may be a material change in the affairs of Centurion Energy International Inc. (the "Corporation"). This letter is itemized in the same manner as the form required by the *Securities Act* (Alberta), *Securities Act* (British Columbia), *Securities Act* (Saskatchewan), *Securities Act* (Manitoba) and *Securities Act* (Ontario).

Concurrent with this filing, this letter is being filed with The Toronto Stock Exchange, being the only exchange on which the Corporation's shares are listed.

Item 1 - Reporting Issuer

Centurion Energy International Inc.
800 Bow Valley Square II
205 5th Avenue S.W.
Calgary, Alberta
T2P 2V7

Item 2 - Date of Material Change

The material change occurred on or about September 7, 2000.

Item 3 - Publication of Material Change

A press release was issued on September 7, 2000 through the facilities of Canadian Corporate News.

Item 4 - Summary of Material Change

The Corporation's Al Manzah #2 well located on the Grombalia Permit, Tunisia, tested at initial rates of approximately 9,000 barrels of oil per day ("bopd") bopd with no water production. The Corporation is the operator of Grombalia Permit through its subsidiary Ecumed Petroleum and owns 37.5% net working interest in the permit.

The well will be put on production at an optimum flow rate which is currently being investigated. Production from the well is expected to commence in approximately a week, immediately following logging and completion operations.

Item 5 - Full Description of Material Change

The Corporation announces initial testing results of its Al Manzah #2 development well located on the Corporation's Grombalia Permit in Tunisia.

Al Manzah #2 horizontal well was spudded August 4th and reached total depth of 1162 metres in the Bou Dabbous reservoir on September 4th. Al Manzah #2 well bottomed 55 vertical metres below the lowest known oil in the discovery well, Al Manzah #1, and has penetrated 219 meters of the Bou Dabbous reservoir. Bottom-hole location of Al Manzah #2 is 542 metres to the northwest of Al Manzah #1.

Al Manzah #2 tested at initial rates of approximately 9,000 bopd with no water production. The Corporation is the operator of Grombalia Permit through its subsidiary Ecumed Petroleum and owns 37.5% net working interest in the permit. The well will be put on production at an optimum flow rate which is currently being investigated. Production from the well is expected to commence in approximately a week, immediately following logging and completion operations.

This is the first horizontal well drilled in the Al Manzah field following the Corporation's Al Manzah #1 that is currently on production.

At present, the Corporation's development plan calls for one additional well, Al Manzah #3, which is anticipated to spud in October. The Al Manzah field plan of development could be expanded to a total of five wells.

Item 6

Not applicable.

Item 7

Not applicable.

Item 8 - Senior Officer

The name of a Senior Officer of the Corporation who is knowledgeable about the material change and who can be contacted by the Commission is:

Barry Swan, Vice-President, at (403) 263-6002

Item 9 - Statement of Senior Officer

The foregoing accurately discloses the material changes referred to herein.

DATED at the City of Calgary, in the Province of Alberta, this 7th day of September, 2000.
