Press Release

Phase 3 Drill Program Commences on Windfall Lake Gold Project

Vancouver, BC - Fury Explorations Ltd. (FUR - TSXV), Noront Resources Ltd. and Alto Ventures Ltd. are pleased to announce that work has commenced on a diamond drill program to further explore a new gold discovery made in 2003 on the Windfall Lake Project, Urban Township, Quebec

Phase 3 drilling will consist of an initial program of 4 holes to follow up strong mineralization discovered in the first two phases of drilling completed in 2003. That drilling established that three and perhaps four high-grade lenses appear to strike at between 100 and 135 degrees and dip to the northeast at relatively shallow angles (35 to 45 degrees). The first four holes (approximately 1100 m) in the phase 3 program are intended to firmly establish the orientation. A further 1400 m is budgeted to test extensions along confirmed orientations in the first four holes.

Fury completed 4,118 metres of drilling in 21 holes on the Windfall Lake Project during exploration programs conducted in 2003. Results demonstrate continuous high-grade gold mineralization within an envelope of lower grade material that follows a prescribed model containing 2 parallel zones. Both zones contain significant high-grade intersections, highlighted by holes:

FUR-03-03:	**8.90 g/t over 6.0 m at 25 m below surface and;**
	10.25 g/t over 22.85 m at 210 m below surface
FUR-03-07:	**8.35 g/t over 7.00 m at 195 m below surface including;**
	16.79 g/t over 3.00 m

Fury Explorations can earn 75% of AltoVentures Ltd. 50% interest in The Windfall Lake property. Noront Resources owns the remaining 50% interest.

FURY EXPLORATIONS LTD.
