FORM 51-102F3
MATERIAL CHANGE REPORT

SECTION 85(1) OF THE SECURITIES ACT (B.C.)
SECTION 118(1) OF THE SECURITIES ACT (AB.)

Item 1. Reporting Issuer

FURY EXPLORATIONS LTD.
1790– 999 West Hastings Street
Vancouver, BC V6C 2W2
Telephone: (604) 689-1810
Facsimile: (604) 689-1817

Item 2. Date of Material Change

October 2, 2007

Item 3. Press Release

State the date and place(s) of issuance of the press release issued:

October 2, 2007 - Issued to the TSX Venture Exchange and disseminated through Vancouver Stockwatch and Canada Newswire.

Item 4. Summary of Material Change

See attached.

Item 5. Full Description of Material Change

See attached.

Item 6. Confidentiality

This report is not being filed on a confidential basis.

Item 7. Omitted Information

There are no significant facts required to be disclosed herein, which have been omitted.

Item 8. Senior Officer

Contact: **Steve Vanry, President**
Telephone #: **(604) 689-1810**

Item 9. Statement of Senior Officer

The foregoing accurately discloses the material change referred to herein.

FURY EXPLORATIONS LTD.

"Steve Vanry"
Steve Vanry, President

DATED at Vancouver, B.C., this 2nd day of October, 2007.

PR2007-17

Fury Samples 712 g/t Silver Over 1.5 Meters at Guijoso

Vancouver, BC – October 2, 2007 – Fury Explorations Ltd. (the "Company") announces further silver assay results from its 100% controlled Guijoso Property, Jalisco, Mexico. Comprehensive mapping and sampling have delineated a zone of high-grade silver and gold mineralization within several vein structures with a combined strike length of 2 kilometers. This recently concluded, highly generative field work, prompted the Company to initiate the first ever known drill program at Guijoso. Drilling is expected to commence within one week and is designed to test multiple targets within the vein structures which have sampled up to 3,000 g/t silver and 4.7 g/t gold (see June 20, 2007 PR#2007-13 and March 8, 2007 PR#2007-4).

Recent sampling is from vein exposures on road cuts established as access for the upcoming drill program. Highlights are shown in Table 1.

Table 1. Assay Results

Vein	Description	True Width (meters)	Silver (g/t)
North	Channel	1.50	712.0
South	Channel	0.60	510.0
South Subsidiary	Channel	0.60	452.0
North	Channel	1.50	245.0
North	Channel	3.00	203.0
South Subsidiary	Channel	1.50	142.0
South Subsidiary	Channel	1.50	117.0
South Subsidiary	Channel	1.50	92.4
South Subsidiary	Channel	0.50	62.5
Central	Channel	1.50	51.6
North	Channel	2.00	46.0
South Subsidiary	Channel	1.50	37.0

To date, exploration has been focused within an 800 meter x 500 meter area (40 hectares), hosting the intermittently exposed North, South and Central veins. This area represents a small fraction of the total 5,080 hectare Guijoso concession which covers other prospective geology that has never been the subject of modern exploration.

Assaying is being completed by ALS Chemex. The samples are prepared by the ALS Chemex prep lab in Guadalajara, Mexico and the pulps are shipped to the ALS Chemex laboratory in Vancouver for assaying. Gold assays are preformed on a 30 gram sample by fire assay with atomic absorption finish. Other elements are assayed using an Induced coupled plasma technique after an aqua regia leach. Samples that assay > 100 g/t Ag are reassayed using an aqua regia digestion with an atomic absorption finish.

The current exploration program at Guijoso is being managed by geologist, Senor Antonio Montante of San Luis Potosi, Mexico. Mr. Ken Thorsen, B.Sc. P.Eng., Chairman and Director of Fury Explorations has reviewed the content of this press release, and is the Qualified Person for the Company, as defined by National Instrument 43-101.

FURY EXPLORATIONS LTD.

On Behalf of the Board,

Steve Vanry, CFA - President

Forward-Looking Statements: Statements in this release that are forward-looking statements are subject to various risks and uncertainties concerning the specific factors disclosed under the heading "Risk Factors" and elsewhere in the corporations' periodic filings with Canadian Securities Regulators. Such information contained herein represents management's best judgment as of the date hereof based on information currently available. Statements in this press release other than purely historical information, including statements relating to the company's future plans and objectives or expected results, constitute forward-looking statements. Forward looking statements are based on numerous assumptions and are subject to all of the risks and uncertainties inherent in the company's business, including risks inherent in mineral exploration and development. The company does not assume the obligation to update any forward-looking statement.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
