

Edgewater Wireless' WiFi3 Technology Receives Certification in India

Edgewater Wireless Country Partner Rare Tech Leads Market Opportunity for High Density WiFi in India

March 11, 2016, Ottawa, Canada - Edgewater Wireless Systems Inc. (YFI; TSX.V), the manufacturer of multi-channel WiFi3™ technology for high-density WiFi applications, is pleased to announce the certification of its multi-channel WiFi3™ technology in India. The company, in partnership with Edgewater's New Delhi based partner Rare Tech, received the certification which opens the door for Rare Tech to capitalize on the expansive market opportunity for high-density WiFi throughout India.

"We are very pleased to have completed certification of WiFi3™ technology and Edgewater Wireless access point products for India," said Sandeep Chadha, Managing Director of Rare Tech. "Over the past 6 months we have focused on introducing what we believe is the best solution for the quickly evolving high density WiFi market here in India. India is already one of the highest density markets in the world. WiFi3™ is the right solution to address the issues of connectivity and congestion that plague WiFi deployments throughout our country."

With over 960,000,000 mobile phones in India, second only to China, the density of WiFi networks, data demand and mobile devices has created an extremely challenging and dirty RF environment for deploying WiFi networks. Many parts of India rely on mobile connectivity via WiFi for communications and to access the internet. Edgewater's multi-channel WiFi3™ architecture enables the highest possible WiFi system performance in high-density environments such as stadiums, public transit stations and shopping centers.

"Sandeep and the team at Rare Tech worked extremely hard to achieve certification of WiFi3 technology and Edgewater Wireless access points in India," said Andrew Skafel, CEO of Edgewater Wireless. "Working with Rare Tech we've created significant business and pilot opportunities for us in India. India is a country where it's very challenging to deploy WiFi networks because of the extreme density of devices and RF interference. For the first time, there is a WiFi solution available in India that can better solve the issues of interference and capacity."

Edgewater's WiFi3™ powered technology is the best Wi-Fi solution for carriers, service providers and systems integrators to address the growing problems of interference, capacity and critical mass of users which is stretching networks to their breaking point. Edgewater's patented technology solves the high-density problem while also significantly reducing the equipment investment and operating costs for new network deployments.

About Edgewater Wireless Systems Inc.:

Edgewater Wireless develops and commercializes leading edge technologies and intellectual property for the communications market. Edgewater Wireless delivers advanced product solutions designed to meet the high-density, high quality of service (QoS) and high-reliability needs of service providers and their customers. Leveraging over twenty (20) patents, Edgewater's WiFi3™ is redefining Wi-Fi technology with its wide-band, multi-channel radio and high-capacity Access Point solutions to deliver next generation Wi-Fi, today.

The best solution for High-Density Wi-Fi networks, Edgewater Wireless WiFi3™ powered access point products enable innovative service providers to plan, build and deploy reliable, high-capacity services (like VoWiFi) for high-density wireless data demand in any environment.

Do more with less! Fewer access points delivering high quality service at a lower overall deployment cost make our patented WiFi3™ technology the right choice for your next Wi-Fi network.

About Rare Tech

Founded in 2007, RARE TECH is a specialized company focused on delivering 360-degree turn-key services and solutions to companies, institutes, associations and organizations throughout India. Rare Tech offers stable and engaged access for international companies to build reciprocal and mutually beneficial alliances with India-based organizations and to support general expansion in the Indian market.

We specialize in offering solutions and services that facilitate technology transfer, business collaborations, mergers & acquisitions all across the globe. The company maintains strong relationships with many International clients worldwide. RARE TECH aspires to steer industry players in accomplishing the utmost opportunity in India.

Since last year, Rare Tech has done some strategic alliances to introduce some new patented and innovative technologies from India and abroad in different Industry segments.
