NEWS RELEASE

00-14

Discovery-Corp stakes ground connecting Rainbow and Galaxy

September 12, 2000

Discovery-Corp Enterprises Inc. (the "Company") is pleased to announce that on Sept. 8, 2000 it acquired, by staking, 12 units in the Kamloops Mining Division (see www.discovery-corp.com for a location map). These 12 units, collectively known as the DCE1 claim, comprise approximately 250 Ha. (600 acres).

The DCE1 claim is strategically located between the Company's Rainbow and Galaxy properties. The Rainbow (Teck Corp. 70%/Discovery-Corp 30%) has a resource of 15.86 million tons of ore grading .528% Cu. The Galaxy (100% Discovery-Corp) has a resource of 2.56 million tons of ore grading 0.65% Cu.

The DCE1 property unites the Rainbow and Galaxy properties consolidating Discovery-Corp's land position in this rapidly developing high grade copper area. Drilling by DRC Resources on their Afton mine project immediately to the northwest of the Rainbow property has resulted in significant intersections of a mineralized zone with Cu/Au/Ag/Pd values up to 4.0% copper equivalent (see Discovery-Corp's NR OO-13).

Dedicated to discovering value!

On behalf of the Board

"Alex Pannu"
