Revenues	3,075.9	3,158.4	-82.5	-2.6%	1,078.1	1,029.8	48.3	4.7%

- Revenues fell slightly in the first half of 2023, mainly due to a start to the year conditioned by some transitory and extraordinary factors;
- In the second half of the year, the Group achieved organic growth in the high single digits, showing a significant progression and expansion of underlying trends in both the coffee and nutrition and food preparation sectors;
- The group's sales in Q4 were up 4.7% (8% at constant currency), thanks to a strong contribution from the European area and core products.

- **South-Western Europe** saw a partial decline in turnover in the year, however the area achieved high-single digit organic growth in the second half of the year. Germany and France saw turnover in the high teens in the fourth quarter;
- **North-Eastern Europe** recorded a substantial positive trend in 2023, with additional progress made in the last few months of the year, thanks to a significant expansion of the core product categories in the major markets;
- **MEIA** area had organic growth in the low teens in the fourth quarter, but it remained negative in the year due to macroeconomic conditions;
- in 2023 the result of the **Americas** area was significantly affected by the impact of the exit from the mobile air conditioning business, net of which the turnover would have been slightly lower than the previous year, with the coffee and nutrition and food preparation business is in positive territory in organic terms in the 12 months;
- finally, the **Asia Pacific** region achieved an expansion in turnover in organic terms over the twelve months, thanks to an acceleration in the second half of the year, which led to mid-single-digit organic growth in the fourth quarter.

* pertaining to the Group

- the **net industrial margin** stood at €1,504.3 million, which equals 48.9% of revenues, compared to 47.3% in 2022, benefiting from a positive effect of the price mix and an easing of inflationary pressures on product costs;
- **adjusted Ebitda** was €444.2 million, or 14.4% of revenues, a substantial increase from 2022 (at 11.5%). The constant increase in profitability achieved over the year was additionally contributed by partial savings from media and communication ("A&P") investments, which were achieved through improved spending effectiveness and more targeted use of assets and channels. The currency component had a negative impact.

NET CASH FLOW (FY2023)

KEY TAKEAWAYS

1

The Q4 showed a **high-single digit organic growth**, extending the improved trend already seen from Q2 and consolidating the phase of gradual post-pandemic normalisation.

2

The Group has reaffirmed its commitment to communication and innovation, which has been strengthened in recent months by the launch of the new "**Perfetto**" and "**Nutribullet: it's that simple**" campaigns.

3

Net financial position as at 31 December 2023 stood at 663 M€, an increase of €364 million over the previous year, thanks to significant cash generation in Q4.

4

During the year, margins improved significantly due to rigorous cost control, a careful investment strategy and partial easing of inflationary pressures on some industrial costs, allowing the 2022 decline to be quickly recovered.

Q4 & FY 2023 RESULTS

FY 2024 GUIDANCE

In the words of the C.E.O., Fabio de' Longhi:

“In 2023, the Group once again demonstrated its ability to seize market opportunities, achieving organic growth at a high single-digit rate in the second half of the year, supported by its ongoing expansion of the coffee machines category and the path back to growth of the nutrition and food preparation sector.

During the year, margins improved significantly due to rigorous cost control and a careful investment strategy, allowing the 2022 decline to be quickly recovered.

These results enabled the Group to obtain significant cash generation (approx. €436 million before dividends), which was also strategically used in the establishment of the professional coffee hub with La Marzocco and Eversys for further strengthening its leadership in the market and for creating value for shareholders.

The Group's recent improvement in growth and profitability dynamics leads us to estimate a revenue growth in 2024, which includes the perimeter expansion with the business combination between La Marzocco and Eversys, in the 9%-11% range. In terms of margins, we expect an improvement for the new perimeter, potentially leading to an adjusted Ebitda of around €500-530 million.”
