ITEM 3 PRESS RELEASE

Issued March 31, 2003 at Vancouver, BC

ITEM 4 SUMMARY OF MATERIAL CHANGE

Drill results from Thompson Bay Property.

ITEM 5 FULL DESCRIPTION OF MATERIAL CHANGE

The Company announces that results of drill hole #1 of a proposed five hole program have been received. The hole was drilled into a UTEM/VLF conductor approximately 600 meters west and on strike with the Copper Bell showing on adjoining claims to the east of the Thompson Bay property.

Hole #1 was drilled to a depth of 105.8 meters (347 ft) and intersected the targeted alteration zone to the southwest of "Mouse Pond". The drill hole intersected approximately 15 meters of mineralization which was sent for assay. Assay results have indicated no economic quantities of gold or copper mineralization. Further drilling has been suspended on this target pending geological evaluation and petrographic results. Four other targets exist on the Thompson Bay property and a decision will be made if and when to drill them.
