The foregoing accurately discloses the material change referred to herein.

DATED at Vancouver, BC this 4th day of December 22 2005.

"Leonard J. Harris"

Leonard J. Harris
President

Schedule “A”

The Company together with its 100% owned subsidiary Anglo-Canadian Gold Corp. are pleased to announce it has acquired the Zeus and Zeus #1 copper/gold claims located approximately 40kms northwest of Lillooet. The claims are made up of two 20 unit blocks and cover approximately 1000 hectares. They are fairly easily accessed by the all weather Bridge River Road and then by a 26km Forestry Road.

WORK HISTORY: Department of Energy and Mines files indicate the majority of exploration programs were conducted between 1983 and 1995. These programs included geochemistry geophysics, mapping, trenching and diamond drilling. Over 2500 meters of drilling was completed in 1995. To date, a total of 8959 meters of drilling in 105 holes has been completed. The principal vein is approximately two meters thick and can be traced for 700 meters. According to the Minfiles, a small copper/gold resource has been defined as a result of drilling to date. The potential to expand this resource is considered good. Geology on the property suggests a porphyry copper/gold deposit may be the source of the existing mineralization. This possibility is the main reason for the acquisition although the auriferous quartz veining system warrants further work to determine its potential.

TERMS: The Company must pay to the vendor $15,000.00 cash and 350,000 common treasury shares for a 100% interest in the claims. The claims are subject to a 2% NSR (Net Smelter Royalty). The royalty may be purchased for $500,000 per 1%. This transaction is subject to TSX Venture Exchange approval.
