Form 51-102F3

MATERIAL CHANGE REPORT

ITEM 1 **REPORTING ISSUER**

ANGLO-CANADIAN URANIUM CORP..
(the "Company")
1150 – 355 Burrard Street
Vancouver, B.C. V6C 2G8

ITEM 2 **DATE OF MATERIAL CHANGE**

July 18, 2006

ITEM 3 PRESS RELEASES

Issued July 18, 2006 at Vancouver, BC via Stockwatch

ITEM 4 **SUMMARY OF MATERIAL CHANGE**

The Company has acquired by staking additional uranium claims in the state of Utah. This property, named the Dragon property, is comprised of 30 claims located in Beaver County, in south western Utah. This staking agreement includes a one mile area of interest surrounding the claims, also containing potential uranium prospects. This acquisition further compliments the Company's current uranium portfolio of projects and establishes it as an emerging player in the Utah and Colorado uranium district.

In addition to all staking costs, the Company will pay a property location fee of US $10,000, 60,000 shares of common stock and a 2% NSR royalty.

ITEM 5 **FULL DESCRIPTION OF MATERIAL CHANGE**

See Schedule "A" N/A

ITEM 6 **RELIANCE ON SUBSECTION 7.1(2) of NATIONAL INSTRUMENT 51-102**

This report is not being filed on a confidential basis.

ITEM 7 **OMITTED INFORMATION**

There are no significant facts required to be disclosed herein which has been omitted.

ITEM 8 **DIRECTOR/SENIOR OFFICER**

Contact: Leonard J. Harris
Telephone: (604) 669-6807

ITEM 9 **STATEMENT OF SENIOR OFFICER/DIRECTOR**

The foregoing accurately discloses the material change referred to herein**.**

DATED at Vancouver, BC this 18th day of July 2006.

"Leonard J. Harris"

Leonard J. Harris
President

Schedule "A"

Anglo-Canadian Uranium Corp. is pleased to announce it has acquired by staking additional uranium claims in the state of Utah. This property, named the Dragon property, is comprised of 30 claims located in Beaver County, in south western Utah. This staking agreement includes a one mile area of interest surrounding the claims, also containing potential uranium prospects. This acquisition further compliments the Company's current uranium portfolio of projects and establishes it as an emerging player in the Utah and Colorado uranium district.

The Dragon Property lies in a significant uranium region, and has demonstrated high scintilometer counts over a large area where historical uranium mines and deposits occur. These high counts are associated with hematite, pyrite, silica and fluorite mineralization in an altered volcanic unit. Selected grab samples (altered volcanics with readings) run as high as 0.16 % (3.5 pounds) U_3O_8. This highly altered rock can also be seen on high resolution satellite imagery. Additional staking is currently in progress on this and other prospective Utah and surrounding region properties.

In addition to all staking costs, the Company will pay a property location fee of US $10,000, 60,000 shares of common stock and a 2% NSR royalty.

The technical portion of this release has been approved by James A.Turner. P.Geo., a qualified person under NI 43-101. This acquisition is subject to approval by the TSX Venture Exchange.
