GWR RESOURCES INC

GWR Recommences Drilling at Lac La Hache

October 20, 2015. Vancouver, BC. David H. Brett, President & CEO, GWR Resources Inc. (the "Company," TSX Venture: GWQ) reports that the Company has recommenced drilling at its 100% owned Lac La Hache Property in the Cariboo Region of central British Columbia, following up on strong drill results in the Aurizon South Zone, which included AZS15-42 that intercepted 10 metres grading 7.7 grams per ton (gpt) gold, 1.3% copper, and 6.5 gpt silver. The follow up program will consist of three holes comprising 650 metres seeking to extend the known high-grade Aurizon South mineralization.

“We’re excited to be back drilling at Lac La Hache” said GWR CEO David Brett. “The geological team is on site and working hard to advance this strong project in a great location.”

Surface exploration will also continue on the newly discovered Berkey disseminated copper-gold porphyry occurrence, where assays from chip sampling across the prospect produced a grade of 0.45% Cu over 2.4 m. Grab samples assayed 0.35% Cu, 0.47% Cu and 1.5% Cu.

The technical contents of this news release have been reviewed and approved by Rob Shives, P.Geo., VP Exploration to the company and a qualified person as defined in National Instrument 43-101.

This news release may contain "forward-looking statements". All statements in this release, other than statements of historical facts that address exploration drilling, exploitation activities and other related events or developments are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploration and exploitation successes, continuity of mineralization, uncertainties related to the ability to obtain necessary permits, licenses and title and delays due to third party opposition, changes in government policies regarding mining and natural resource exploration and exploitation, continued availability of capital and financing, and general economic, market or business conditions. Readers are cautioned that any such statements are not guarantees of future performance and that actual development or results may vary materially from those in these "forward looking statements."

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
