

Form 51-102F3
Material Change Report

Item 1 Name and Address of Company

International Millennium Mining Corp.
3rd Floor – 120 Lonsdale Street,
North Vancouver, B.C.
V7M 2E8

Item 2 Date of Material Change

April 8, 2008

Item 3 News Release

A news release dated April 8, 2008, delivered to Marketwire and Canada Stockwatch.

Item 4 Summary of Material Change

The Issuer has signed a drilling contract with Cabo Drilling Corp. for an initial 2500 meters of diamond drilling near the Waldman mine on its Cobalt Area Property in Ontario. The program is scheduled to commence April 15, 2008.

Item 5 Full Description of Material Change

See attached news release dated April 8, 2008.

Item 6 Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

N/A.

Item 7 Omitted Information

None

Item 8 Executive Officer

John A. Versfelt, President & CEO, Telephone: 604 984-9907

Item 9 Date of Report

Dated at Vancouver, British Columbia this 8th day of April, 2008.

Signed: *“John A. Versfelt”*

John A. Versfelt, President & CEO

FOR RELEASE: April 8, 2008

Telephone: (604) 984-9907

Facsimile: (604) 983-8056

CONTACT: **John A. Versfelt**, President & CEO

INTERNATIONAL MILLENNIUM TO DRILL COBALT AREA PROPERTY

North Vancouver, B.C. International Millennium Mining Corp. ("IMMC" or the "Company") (TSX-V: IMI) has signed a drilling contract with Cabo Drilling Corp. for an initial 2500 meters of diamond drilling near the Waldman mine on its Cobalt Area Property in Ontario. The purpose of the program is to test several strong targets identified by a MMI (mobile metal ion) sampling program completed over the Cobalt Area property in the past year (see the Company's news release of January 10th 2008). The program is scheduled to commence April 15, 2008.

David G. Mark, P.Geo, a qualified person under policy NI 43-101, reports that the locations of the drill holes for this initial program was determined by the MMI work done over three grids with most of the anomalous results occurring on Grid One in Gillies Limit North Township in close proximity to the Waldman Mine Shaft.

Two former small producers are located on the Company's property and a further twelve former mines contiguous to and within 3,000 meters to the east of the IMMC drill project produced in excess of 100 million ounces of silver, along with cobalt, copper, and nickel. SMC (Canada) Ltd. currently has a mill operating 500 meters east of the project.

Past production within these mines was mostly from arsenide silver/cobalt mineralization occurring in narrow, but very rich veins (in the thousands of ounces Ag per ton range). Consequently, MMI anomalies occurring in this area are strong drill targets. The anomalies range in strike length from 100 meters up to possibly 750 meters (production in the past was from veins with strike lengths varying from 30 to 100 meters.).

The drilling program will also pursue base metal sulphide type mineralization which is known to occur in the area.

The Cobalt Area property comprises some 620 claim units covering approximately 9,920 hectares located in Temiskaming District, Larder Lake Mining Division south of the town of Cobalt in northeastern Ontario. IMMC holds, either outright or under option, 100% interest in these claims, subject to royalty.

The rocks that underlie the Cobalt Area Project include Archean aged mafic to felsic metavolcanics and Algonian granitic rocks overlain by relatively flat lying Huronian Group metasediments. A Nipissing aged diabase dyke and sill complex intrudes all of these rock types. Lamprophyre dykes and mafic to ultramafic diatremes intrude the volcanic and granitic rocks.

International Millennium Mining Corp. is a mineral exploration and development company engaged in the acquisition and exploration of mineral properties in Canada and the Americas. To date, the Company has acquired and is exploring mineral properties in British Columbia and Ontario, Canada; Nevada, USA; and Sonora State, Mexico. Emerging mineral targets include silver, gold, cobalt, molybdenum, zinc, lead, nickel, copper and platinum group metals.

ON BEHALF OF THE BOARD,

"John A. Versfelt"

John A. Versfelt
President & CEO

Further information about the Company can be found on SEDAR (www.sedar.com) or by contacting Mr. John A. Versfelt, President & CEO of the Company or Mr. D. Alex Caldwell, Corporate Secretary at 604-984-9907.
