MILLENNIUM SILVER ENGAGES ROBISON ENGINEERING FOR WATER INFRASTRUCTURE DEVELOPMENT AT SILVER PEAK

VANCOUVER, BRITISH COLUMBIA, CANADA August 5, 2026 — Millennium Silver Corp. (TSX-V: MSC) ("Millennium Silver" or the "Company") is pleased to provide an update on its previously announced water infrastructure and permitting initiatives at the Silver Peak silver-gold project in Esmeralda County, Nevada (see news release dated May 4, 2026).

The Company has engaged Robison Engineering Company, Inc. ("Robison Engineering"), a Nevada-based engineering firm headquartered in Sparks, Nevada, to design and oversee the installation of a water capture system at the Nivloc area of the Silver Peak project. The system will utilize the Company's existing water rights to supply water in support of the planned 2026 resource expansion drilling program.

The scope of work includes:

- Topographic survey and inspection of the proposed work area;
- Engineering design of a water capture system for the development of an existing shallow water source;
- Installation of a water capture system to provide water from existing rights owned by the Company to support exploration drilling.

Work is expected to commence shortly, with major deliverables anticipated within approximately six to eight weeks of start, subject to site conditions and contractor availability.

Robert Drago, President and CEO of Millennium Silver, commented: "Engaging Robison Engineering marks an important step forward in preparing the Silver Peak project for our 2026 drill campaign. Securing a reliable on-site water supply through our existing water rights is essential infrastructure that will support efficient and responsible exploration as we work to expand the known resource along the Nivloc Structure."

About Millennium Silver Corp.

Millennium Silver Corp. (TSX-V: MSC) is a Canadian mineral exploration company focused on the discovery, expansion and development of high-grade silver and gold deposits in Nevada. Its flagship asset is the Silver Peak project. Common shares trade on the TSX Venture Exchange under the symbol "MSC."
