This is the form of a material change report required under Section 85(1) of the Securities Act and section 151 of the Securities Rules.

FORM 27

SECURITIES ACT

MATERIAL CHANGE REPORT UNDER SECTION 85(1) OF THE ACT

NOTE: This form is intended as a guideline. A letter or other document may be used if the substantive requirements of this form are complied with.

.

NOTE: Every report required to be filed under section 85(1) of the Act shall be sent to the Commission in an envelope addressed to the Commission and marked "Continuous Disclosure."

NOTE: WHERE THIS REPORT IS FILED ON A CONFIDENTIAL BASIS PUT AT THE BEGINNING OF THE REPORT IN BLOCK CAPITALS "CONFIDENTIAL - SECTION 85", AND EVERYTHING THAT IS REQUIRED TO BE FILED SHALL BE PLACED IN AN ENVELOPE ADDRESSED TO THE SECRETARY OF THE COMMISSION MARKED "CONFIDENTIAL."

Item 1. Reporting Issuer

State the full name and address of the principal office in Canada of the reporting issuer.

STARFIRE MINERALS INC.
301 - 850 West Hastings Street
Vancouver, British Columbia
V6C 1E1

Item 2. Date of Material Change

May 17, 2000

Item 3. Press Release

State the date and place(s) of issuance of the press release issued pursuant to Section 85(1) of the Act.

A News Release dated and issued May 17, 2000 at Vancouver, BC, through Vancouver Stockwatch, George Cross News Letter, Market News and the Canadian Venture Exchange.

Item 4. Summary of Material Change

Provide a brief but accurate summary of the nature and substance of the material change.

See news release, a copy of which is attached hereto.

Item 5. *<u>Full Description of Material Change</u>*

Supplement the summary required under Item 4 with the disclosure which should be sufficiently complete to enable a reader to appreciate the significance of the material change without reference to other materials. Management is in the best position to determine what facts are significant and must disclose those facts in a meaningful manner. See also Item 7.

This description of the significant facts relating to the material change will therefore include some or all of the following: dates, parties, terms and conditions, description of any assets, liabilities or capital affected, purpose, financial or dollar values, reasons for the change, and a general comment on the probable impact on the reporting issuer or its subsidiaries. Specific financial forecasts would not normally be required to comply with this form.

The above list merely describes examples of some of the facts which may be significant. The list is not intended to be inclusive or exhaustive of the information required in any particular situation.

See news release, a copy of which is attached hereto.

Item 6. *<u>Reliance on Section 85(2) of the Act</u>*

If the report is being filed on a confidential basis in reliance on Section 85(2) of the Act, state the reasons for such reliance.

<u>INSTRUCTIONS:</u>

Refer to Section 85(3) of the Act concerning continuing obligations in respect of reports filed pursuant to this subsection.

Not applicable.

Item 7. *<u>Omitted Information</u>*

In certain circumstances where a material change has occurred and a material change report has been or is about to be filed but Section 85(3) of the Act will no longer or will not be relied upon, a reporting issuer may nevertheless believe one or more significant facts otherwise required to be disclosed in the material change report should remain confidential and not be disclosed or not be disclosed in full detail in the material change report.
State whether any information has been omitted on this basis and provide the reasons for any such omission in sufficient detail to permit the Commission to exercise its discretion pursuant to Section 169(4) of the Act.
The reasons for the omission may be contained in a separate letter filed as provided in Section 153 of the Rules.

Not applicable.

Item 8. *Senior Officers*

To facilitate any necessary follow-up by the Commission, give the name and business telephone number of a senior officer of the reporting issuer who is knowledgeable about the material change and the report or an officer through whom such senior officer may be contacted by the Commission.

Boyce Butler, Director: Telephone (604) 623-3101.

Item 9. *Statement of Senior Officer*

Include a statement in the following form signed by a senior officer or the reporting issuer:

"The foregoing accurately discloses the material change referred to herein".

Also include date and place of making the statement.

I hereby certify the foregoing accurately discloses the material change referred to herein:

SIGNED:	"*Boyce Butler*" ______________________________ Boyce Butler
OFFICE HELD:	Director
DATED:	Vancouver, British Columbia, on May 17, 2000.

STARFIRE MINERALS INC.

CDNX SYMBOL: SFR
Shares Outstanding: 7.1 million
DATE: May 17, 2000

NEWS RELEASE

Warren/Warren Extension Press Release

Starfire Minerals Inc. is pleased to announce the commencement of diamond drilling on the Company's Warren and Warren extension properties in Massey and Whitesides Townships, some 40 miles west of Timmins, Ontario. Financing is in place and the drilling will begin during the week of May 23, 2000. The properties are known to host several showings of Nickel and Copper in a variety of geologic settings. The Company has retained Brain Polk of Polk Geological Services Inc. to oversee the exploration program.

The rocks underlying the properties are Archean aged, mafic to ultra-mafic, intrusive rocks of the Kamiskotia mafic complex. The body is an anorthositic gabbro intrusive and is expansive over several townships. Outokumpu Mines recently completed a feasibility study on their Montcalm Township nickel project, some 14 miles to the northwest. That deposit is hosted by similar intrusive rocks. The exploration target for Starfire's properties is a deposit of similar nature.

The Warren property consists of 14 patent claims and has seen sporadic work since 1924, mostly in the search for gold. Several north-south striking electromagnetic anomalies are hosted on the patents, only one of which has been drill tested. The "A" zone returned values from drill core including 2.5% Ni + Cu over 7.6 meters and 2.8% Ni + Cu over 8.2 meters as well as values of 5.0% Cu, 2.5% Ni and .2% Co from surface sampling. Mineralization is typically net textured pyrrhotite, chalcopyrite, and pentlandite. The "B" zone is close to (50 meters) and parallel to "A" to the west. Limited surface work and two diamond drill holes have indicated the presence of similar mineralization within this zone. The "C" and "D" zones are parallel and approximately 200 meters to the west from "A". Low Ni and Cu values are reported from limited surface work.

The Warren Extension property consists of 3 claims (24 units) north of the Warren property. Geophysical anomalies on this property, as outlined by VLF and PEM surveys, show a similar geometry to those on the patents and are predicted to be extensions of the same. Only one drill hole has been drilled on these targets. The 1996 drill hole intersected two of the zones (A and B), which returned values of .36% Cu with anomalous Ni and Co over 3 meters and 1.03% Cu over 3.3 meters (including 3.62% Cu over .5 meters).

All of these anomalies show good strike length potential, coincidence with magnetic highs and are, in general, poorly tested. Strong, untested PEM anomalies near the 1996 drill hole are the target for this round of drilling. At least 600 meters of strategic exploration drilling are slated for the properties to test these numerous conductors. Any positive drill results will lead to more comprehensive geophysical coverage and continued diamond drilling.

ON BEHALF OF THE BOARD OF DIRECTORS OF STARFIRE MINERALS INC.

Michael Caron, President and Director
