A Company Specializing in Environmental Protection and Remediation Technologies

For Immediate Release

EURODIA AND ENPAR ESTABLISH ENPAR SPECIALTIES INC.

September 29, 2015; Guelph, Ontario. Dr. Gene Shelp, President and CEO of ENPAR Technologies Inc. (TSX-V:ENP) ("ENPAR" or "the Company"), is very pleased to announce that Eurodia and ENPAR have established ENPAR SPECIALTIES INC. Ownership in the Canadian-based joint-venture is 51% and 49% for Eurodia and ENPAR, respectively.

Dr. Shelp commented, "The partners are excited about business opportunities in the agro-food industry and anticipate near-term contracts based on EURODIA's marketing efforts to-date."

With over 70 chemical engineers, production personnel, maintenance technicians and support staff, EURODIA (www.eurodia.com) is one of the world's leading specialists in membrane treatment for the food industry. EURODIA has a vast network of agents and licensed distributors to support over 25 years experience in the design, construction and operation of turnkey solution treatment systems. These systems range from ion exchange and electrodialysis to chromatography and filtration technologies for clients in the dairy, wine, sugar, sweetener, starch and green (or bio-based) chemical industries worldwide.

ENPAR SPECIALTIES INC. will combine EURODIA's stellar reputation in the agro-food industry with proven novel technologies and world class technical talent to exploit a significant global business opportunity. As previously reported, EURODIA believes that the agro-food market offers many large scale application opportunities for the combination of ENPAR and EURODIA technologies, including at least one potential application involving processing of streams totaling several thousand, or even tens of thousands, of cubic meters per hour.

About ENPAR Technologies Inc.

ENPAR is a "Technology Company" applying its patented and proprietary "Electrochemical Technologies" to the treatment of waste water, desalination water and drinking water contaminated by metals or nutrients, i.e., nitrate/ammonia associated with the mining, metal processing, chemical, agricultural, municipal and waste management sectors. The common shares trade on Tier ll of the TSX Venture Exchange under the symbol "ENP".
