

OCAD U and Legend Power lead the way with innovative energy retrofit

February 18, 2015

Toronto, Ontario

Legend Power Systems Inc. (LPS.V) (“Legend”) is pleased to announce that its energy saving product, the Harmonizer, has helped OCAD University (OCAD U) lower the greenhouse emissions of their Toronto campus while saving over \$20,000 per year, with a payback period of 2.6 years. The Harmonizer, a device which saves energy by regulating incoming voltage levels, has reduced the university’s greenhouse gas emissions by 31 metric tons, saving 171,000 kWh per year.

Founded in 1876, OCAD U is one of the first universities in Canada to save using the Harmonizer. The Harmonizer is an ideal fit for the “university of the imagination,” being an institution that teaches its students that collaboration and integration of emerging technologies is of the utmost importance.

“OCAD U has set a strategic priority of developing and implementing an institution-wide sustainability plan,” says Christine Wallace, Manager, Building Projects, Facilities, Planning & Management, OCAD University. “The Harmonizer will help us advance this vision and be a leader in emissions reduction for the post-secondary building sector.”

After seeing such positive results with OCAD U, Legend is excited to assist other collegiate institutions with their energy efficiency strategies. The environmental and monetary savings afforded by the Harmonizer provide the opportunity for universities and colleges to allocate funds towards future educational initiatives.

“Legend’s Harmonizer is proving to be a great fit in the M.U.S.H. sector; we are fortunate to have forward thinking clients such as OCAD U utilizing Legend solutions” says Randy Buchamer, Legend President & CEO.

With the success achieved with OCAD U, there is a large growth opportunity for Legend to continue to expand and develop partnerships with other educational facilities across North America.

About OCAD University

OCAD University (www.ocadu.ca) is Canada’s “university of imagination.” The university, founded in 1876, is dedicated to art and design education, practice and research and to knowledge and invention across a wide range of disciplines. OCAD University is building on its traditional, studio-based strengths, adding new approaches to learning that champion cross-disciplinary practice, collaboration and the integration of emerging technologies. In the Age of Imagination, OCAD University community members will be uniquely qualified to act as catalysts for the next advances in culture, technology and quality of life for all Canadians.

About Legend Power Systems Inc.

Legend Power Systems Inc. (www.legendpower.com) is a leading electrical energy conservation company that manufactures and markets a patented device to help commercial and industrial customers achieve significant energy savings through voltage optimization. Legend Power’s Electrical Harmonizer helps companies reduce their electricity bills, maintenance costs, and increases the life of electrical equipment, while contributing to a reduction in greenhouse gas emissions.
