Legend Power Enters Correctional Facilities Vertical

Southeast Regional Correctional Centre Installs Legend's Solution and Reduces Power Consumption

Vancouver, BC - December 6, 2016 - Legend Power Systems Inc. ("Legend")(TSXV: LPS) and channel sales partner Haven Consultants International ("Haven") today announced that the Southeast Regional Correctional Centre in New Brunswick, Canada became the first major prison to install Legend's Harmonizer as part of its energy savings commitment.

Since installation, the Southeast Regional Correctional Centre has cut its annual power usage by 94,117 kWh resulting in a reduction in greenhouse gas emissions of 17 metric tonnes. The investment is projected to achieve an internal rate of return (IRR) of 24% and payback in under 4-years. Additionally, installation of the Harmonizer did not disrupt Southeast Regional's operations, an important consideration across several of Legend's targeted market verticals.

The prison was designed using Leadership in Energy and Environmental design (LEED) standards, thus is already designed to maximize energy efficiency and minimize water use. The selection of Legend's technology for another high efficiency, LEED certified building is proof of the attractiveness of Legend's technology and its strong energy savings potential.

The sale to the Southeast Regional Correctional Centre represents entry to a new and significant market vertical for Legend. There are in excess of 5,200 correctional facilities in the United States and Canada with a combined annual operating budget of approximately $77 billion. Correctional facilities are one of thirteen major market verticals in which Legend has established a track record of success.

Legend is working closely with Haven, to develop a strong market-specific adoption of the Harmonizer within individual verticals. Legend and Haven intend to actively pursue other opportunities in the correctional facilities market vertical.

About Haven Consultants International

Haven Consultants International is a leading engineering consultancy firm. Originally operating in the UK, the Company has now established operations in North America to offer its experience in the energy efficiency market. Through many years working at the cutting edge of European efficiency initiatives Haven Consultants has developed unrivalled experience dealing with some of the world's more advanced technologies in this field.

About Legend Power Systems Inc.

Legend Power Systems Inc. (www.legendpower.com) markets a proprietary device, the 'Harmonizer' that helps individual buildings reduce energy consumption through the utility-proven concept of Conservation Voltage Reduction, (CVR). Legend provides customers risk free energy savings, improves the value of their physical assets, and enhances their sustainability efforts. As an application with demand side benefits, Legend is also a key contributor toward utility conservation goals. Legend was recognized as the top performing cleantech company on the TSX Venture Exchange in 2015.
