Legend Power® Rebrands the Harmonizer™ as SmartGATE™

Vancouver, B.C., Canada – On November 14, 2018, the ground-breaking technology from Legend Power® Systems Inc. (TSX-V: LPS), a global leader in voltage management technology, is undergoing a name change. The Harmonizer, which is gaining a strong reputation throughout Canada and the U.S. in helping forward-thinking companies to decrease their carbon footprints while reducing costs, is being renamed SmartGATE™.

Said Mark Petersen, Legend Power's VP of Engineering, "SmartGATE™ is uniquely positioned in the electrical room to manage all power in the facility and so is a platform from which the future of power management for buildings will be hosted." He added: "We think the name SmartGATE more accurately conveys the value of an innovative product which puts a building owner in control of the electrical environment in its facilities, provides instant cost savings – and as importantly – lowers its environmental impact."

Voltage management is increasingly important as utilities struggle to meet electricity demand across an aging grid infrastructure. Today, SmartGATE's proprietary and patented technology delivers voltage management reductions of 3 percent to 8 percent, resulting in savings on electrical costs and reduced wear and tear on all of a building's electrical components. In the future, additional feature sets will enable SmartGATE™ to be a catalyst for a greater variety of power management approaches. It allows everyone in the electrical ecosystem to be more energy efficient in the least disruptive way possible.

Said Legend Power CEO, Randy Buchamer, "The product already had 'smart' elements which is why it is one-of-a-kind in its category. With the recent addition of remote monitoring and key power analytics delivered to customers digitally, in real-time, and more innovation coming, we wanted to have the product name reflect the significant benefits that SmartGATE™ creates for every organization that installs it."

Legend Power's SmartGATE™ is currently available with eight systems serving building needs between 600 and 4,000 AMPs. For more on the system's capabilities, please visit <https://legendpower.com/products/>.

About Legend Power® Systems Inc.

Legend Power® Systems Inc. (www.legendpower.com) is a global leader in voltage management technology. They help buildings use less energy by eliminating "overvoltage" – an inherent challenge associated with power grids around the world. Legend's industry-proven SmartGATE™ enables dynamic power management of an entire building. The proprietary and patented system reduces total energy consumption and power costs, while also maximizing the life of electrical equipment. Legend's unique solution is also a key contributor to both corporate sustainability efforts and the meeting of utility energy efficiency targets.

Forward-Looking Statements

This Press Release may contain statements which constitute “forward-looking information”, including statements regarding the plans, intentions, beliefs and current expectations of the Company, its directors, or its officers with respect to the future business activities and operating performance of the Company. The words “may”, “would”, “could”, “will”, “intend”, “plan”, “anticipate”, “believe”, “estimate”, “expect” and similar expressions, as they relate to the Company, or its management, are intended to identify such forward-looking statements. Investors are cautioned that any such forward-looking statements are not guarantees of future business activities or performance and involve risks and uncertainties, and that the Company’s future business activities may differ materially from those in the forward-looking statements as a result of various factors. Such risks, uncertainties and factors are described in the periodic filings with the Canadian securities regulatory authorities, including the Company’s quarterly and annual Management’s Discussion & Analysis, which may be viewed on SEDAR at www.sedar.com. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. Although the Company has attempted to identify important risks, uncertainties and factors which could cause actual results to differ materially, there may be others that cause results not be as anticipated, estimated or intended. The Company does not intend, and does not assume any obligation, to update these forward-looking statements other than as may be required by applicable law.
