BuilderFinish Invests in HomeProject

BuilderFinish president Howard Weiner to join HomeProject's board

Toronto, Ontario – September 24, 2001 – HomeProject.com, Inc. (CDNX: YHP), the leading provider of 3D interactive visualization technology, today announced that BuilderFinish Inc., a Chicago Illinois based company providing private labeled, web-based applications for major US home builders, will participate in the private placement financing recently announced by HomeProject. Mr. Howard Weiner, president of BuilderFinish, has also been appointed to the Board of Directors of HomeProject.com, Inc.

"This investment is significant for BuilderFinish," said Howard Weiner, president of BuilderFinish. "The new home construction industry is entering a major investment cycle in adopting web technology, particularly technology which enables visualization. This move to *virtual* design centers will contribute major efficiencies to the marketing, sales and service for the industry. HomeProject's View22 technology is the most advanced online visualization technology available today, and combined with BuilderFinish's expertise in the new home construction market we create a winning combination, poised to gain a leadership position in this marketplace."

Howard Weiner founded BuilderFinish in March 2000. Mr. Weiner, a 20-year veteran of the home building industry, established BuilderFinish in order to provide builders with web-based tools, which dramatically simplify the residential option selection process. Earlier this year BuilderFinish licensed the View22 technology to create the first web-based 3D builder option selection system for new homes. The system provides an efficient and cost effective vehicle for new homeowners to select finishes and upgrades for their new home. To date, 14 builders have signed up to the system. Mr. Weiner will be replacing Mr. Henry Lach as a board member.

"I have always been extremely satisfied as a customer of HomeProject's," said Weiner. "Now, in my new role as board member and investor, I am very excited about the opportunity to guide and influence the direction of this company."

"We have always seen our customers more as strategic partners. By coupling their industry knowledge and contacts with our technology expertise we are able to bring a superior product to market which means increased value for our customer, their customers and HomeProject," said Amnon Zohar, president and CEO of HomeProject.com, Inc. "The addition of Howard Weiner to the Board of Directors is an important milestone for our company. This appointment takes the relationship with BuilderFinish to the next level. Now with an industry expert like Howard on our Board, the \$270 billion housing market has become a primary strategic target for us."

About HomeProject.com, Inc.

HomeProject.com, Inc. is the leading provider of interactive design and visualization solutions, licensing its infrastructure to e-businesses and Global 2000 companies. HomeProject's infrastructure empowers users to do 'real work' on the Web such as 3D design of rooms, gardens and offices.

View22 is the technology division for HomeProject. The View22 Interactive Visualization Environment (IVE) enables partners and clients to quickly deploy a customized environment specific to their needs. The IVE provides solutions to a variety of industries, offering an interactive and compelling user experience for any Web strategy.
