ENERVISION INC.

FORM 27

MATERIAL CHANGE REPORT
UNDER SECTION 75(2) OF THE SECURITIES ACT (ONTARIO)
AND SECTION 81(2) OF THE SECURITIES ACT (NOVA SCOTIA)

1. Reporting Issuer:

EnerVision Incorporated
1791 Barrington Street
Suite 1500
Halifax NS B3J 3L1

2. Date of Material Change:

Effective on or about February 9, 2000

3. Press Release:

The Press Release describing the material changes referred to herein was disseminated on the corporate disclosure network of Canada Newswire Limited on February 28, 2000.

4. Summary of Material Change:

EnerVision Incorporated ("EnerVision") has completed a private placement of 3,494,500 units to residents of Norway at a subscription price of 12,230,750 Norwegian Kroner (or approximately $2.2 million Canadian).

5. Full description of the Material Change:

EnerVision has completed an arm's length private placement of 3,494,500 units to residents of Norway at a subscription price of 12,230,750 Norwegian Kroner (or approximately $2.2 million Canadian) or 3.5 Norwegian Kroner (approximately $0.65 Canadian) per unit. Each unit consists of one common share of EnerVision and one common share purchase warrant. Each warrant will entitle the holder to acquire one common share upon exercise and payment of 5 Norwegian Kroner (approximately $0.92 Canadian) per common share within one year of the date of the warrant.

The placement was made to an individual in Norway who has transferred the Units to various arms length third parties in Norway. Accordingly, the transaction does not result in a change of control of EnerVision.

Proceeds from the private placement have been loaned to AeroGly Holdings Incorporated, a joint venture in which EnerVision has a 50% equity interest, for general working capital purposes.

EnerVision is an environmental services company. Through joint venture AeroGly Services AS, EnerVision provides environmentally sound programs for the use, recovery, processing and reuse of aircraft de-icing fluids to airports in Northern Europe. As previously announced, AeroGly Services AS has been designated as the exclusive contractor for the recycling of de-icer fluid at the Oslo Lufthavn airport in Gardermoen, Norway. AeroGly Services AS is recycling the spent de-icing fluids in a new modern facility, built and equipped at a cost of approximately $4.0 million CDN.

In addition to the aircraft de-icing fluid recycling services through AeroGly Services AS, EnerVision is the owner of the patented Continuous Ablative Regeneration ("C.A.R.") technology which uses pyrolysis reactions to reduce organic materials (such as car tires, wood waste and municipal solid waste) into their original chemistry on an environmentally friendly basis. EnerVision, through a wholly owned subsidiary, is in the process of developing the first commercial C.A.R. plant in Europe near Oslo, Norway.

EnerVision, at present, has, 18,910,278 common shares issued and outstanding.
