NEWS RELEASE

April 28, 2015 **Trading Symbol: GFK**

GFK RESOURCES AND ADVENTURE GOLD AMEND THE CASA-CAMERON OPTION AGREEMENT AND ANNOUCE 2015 EXPLORATION PROGRAM

MONTREAL, QC – GFK Resources Inc. (**GFK: TSX-V**) (the "Company") announces that it has amended the option agreement dated December 11, 2013 (the "Agreement") with Adventure Gold Inc. ("Adventure Gold"). Under the terms of the modified Agreement, GFK will have an additional 18 months to the original schedule to acquire an exclusive option to earn between 51% and 100% interest in Adventure Gold's Casa-Cameron project (the "Project"), in consideration for an immediate payment of $50,000 (see below) originally to have been part of payments due in Phase II of the option. The Project includes nine (9) properties covering 256 km² strategically located along the prolific Casa-Berardi/Cameron Gold Trend, in the Abitibi Greenstone Belt, Quebec. Geophysical work is on-going on four of the Casa-Cameron properties and results will be released when available.

Modified Option Agreement

Under the terms of the Agreement, GFK has the option (the "First Option") to acquire an initial 51% undivided interest in the Project on the following terms and conditions:

- Paying to Adventure Gold $250,000 (paid in December 2013) and issuing 2,000,000 common shares (issued in December 2013);
- Paying to Adventure Gold $50,000 due on April 29, 2015 originally to have been part of payments due in Phase II of the option;
- Funding not less than $2,000,000 in exploration expenditures by no later than February 28, 2017 ($690,000 paid in 2014; $221,981 paid February 27, 2015) (the "Phase 1 Expenditures");
- following the completion of the Phase 1 Expenditures, paying an additional amount of $1,200,000 in cash or, at the election of GFK, in common shares of GFK, subject to a minimum cash payment of $200,000; and
- funding, by no later than February 29, 2020, an additional amount of not less than $3,000,000 in exploration expenditures (the "Phase 2 Expenditures");

Following the completion of the First Option, GFK shall have an additional option (the "Second Option") to acquire Adventure Gold's remaining 49% interest in the Project, thereby acquiring a 100% interest in the Project. The Second Option is conditional upon GFK:

- paying $5,500,000 in cash or, at the election of GFK, in common shares, subject to a minimum cash payment of $500,000; and
- granting Adventure Gold a 2% NSR on the Project, one half (1% NSR) of which can be bought back at any time by GFK, at its sole discretion, for an amount of $1,000,000.

Adventure Gold will act as operator for the First Option and will receive an operator's fee equal to 10% of exploration expenditures funded by GFK.

2015 Exploration Work

In 2015, it is proposed to complete geophysical surveys on the Casagosic, Vezza North, Bell Vezza and Sinclair-Bruneau properties. A total of 54 kilometres of IP and 20 kilometres of ground mag surveys with a 200 metres spacing should be completed by the end of May. Results will be released following final report receiving which is scheduled for June. In addition, 2014 field prospecting work reports for the Bachelor Extension and Florence properties will be completed and filed for assessment purpose with the MRN of Quebec later this summer.

The Casa-Cameron Project

The Casa Cameron Project includes nine (9) gold properties: (1) Casagosic, (2) KLM, (3) Vezza North, (4) Vezza Extension, (5) Bell-Vezza, (6) Sinclair-Bruneau, (7) Florence, (8) Céré-113 and (9) Bachelor Extension (Figure 1). The Properties totaling 480 claims are 100% owned by Adventure Gold, however 74 claims on the Sinclair Bruneau property are subject to a 2% NSR royalty and 43 claims of Florence are subject to a 1% NSR royalty in favour of third parties. The properties are located north of La Sarre, Amos and Lebel-sur-Quevillon, in the northwest region of the province of Quebec and they are accessible all season by paved and gravel roads.

The properties straddles segment of the major Casa-Berardi/Cameron gold break between the Casa-Berardi Gold Mine (proven and probable reserves of 9 Mt at 5.5 g/t Au for 1.5M ounces, measured and indicated resources of 12.2 Mt at 4.1 g/t Au for 1.5M ounces and inferred resources of 5.3Mt at 3.8 g/t Au for 572,500 ounces – Hecla Mining (formerly Aurizon Mines), press release, February 14, 2013) and the Bachelor Gold Mine (also currently in operation by Metanor Resources with proven and probable reserves of 843,800 t at 7.4 g/t Au for 200,200 ounces and inferred resources of 426,100 t at 6.5 g/t Au for 89,400 ounces - Metanor Resources, NI 43-101, April 26, 2011). All the properties contain already identified gold-bearing zones and most of them are also strategically located adjacent and in strike to significant gold mines or deposits (see Figures 1 to 9 available on the Company's website).

Very few modern exploration works were completed on the properties from the 1990's to 2008, when Adventure Gold started to acquire the properties. Gold exploration work conducted by Adventure Gold since then returned very encouraging results and many valuable drill targets were outlined (see the Company's press release dated June 11, 2013 and the technical report (the "Report") which will be filed by GFK on SEDAR in connection with the transaction and prepared in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101")). As described in the Report, the geological setting of the Casa-Cameron properties appears very favorable for the identification of new high-grade gold-bearing structures or bulk-style deposits. Past exploration work did not entirely test the numerous gold occurrences and many positive historical drilling intersections need follow-up drilling. In addition, new geophysical surveys outlined also quality drilling targets. The authors of the Report recommend significant exploration work including a drilling program totalling 21,000 m including 8,000 m in a first phase (see the Report available on the Company's website).

Mr. Jules Riopel, Vice-President Exploration and Acquisitions of Adventure Gold acting as the qualified person (as defined by NI 43-101) reviewed and approved the scientific and technical information in this press release. He is supervising the work program on the Casa-Cameron properties.

About GFK

GFK Resources Inc. is a mining exploration company focused on discovering high quality gold deposits close to existing mines in the Abitibi Greenstone Belt located in north-west Quebec and north-east Ontario - one of the most prolific gold deposits areas in the world. GFK holds assets in Val-d'Or and is now optioning / buying from Adventure Gold Inc. new quality assets along the Casa-Berardi-Cameron Gold Break - a proven environment with strong potential for new gold discoveries and where exploration costs are low. Flagship Casa-Cameron properties are adjacent to: Hecla Mining Company - Casa Berardi Gold Mine, Metanor Resources Inc.– Bachelor Gold Mine, Maudore Minerals Ltd.- Vezza, Discovery and Flordin Gold deposits.
