Total Turns Up The Heat

KELOWNA, January 10, 2017 – TOTAL TELCOM INC. (TSX Venture: TTZ) announced today its wholly owned subsidiary ROM Communications Inc. has launched the first ever Wi-Fi controller and diagnostic system for a line of Premier German built truck, marine and equipment heaters. Initial sales up to the end of December totaled 600 controllers worth \$80,000. It is estimated that in excess of 100,000 German made heaters are sold into North America each year coupled with an existing market of millions of heaters.

Company CEO, Neil Magrath, stated "Orders for heater controllers are typically placed in May for the winter season. Our late October entry into the market was very encouraging with significant sales and very positive feedback. ROM's proprietary controller is filling a void in this market segment and we anticipate an ongoing seasonal revenue stream with significant growth potential."
