

Route1 Announces MobiKEY support for Android

Toronto (August 5, 2015) - Route1 Inc. (TSXV: ROI), a leading provider of secure access technologies for the mobile workspace that protects businesses and government agencies and whose customers include the U.S. Department of Defense, the Department of Homeland Security, the Department of Energy and the Government of Canada, today announced the immediate availability of the MobiKEY technology for Android. MobiKEY is a mobile access solution that uses comprehensive multi-factor authentication and identity management to securely connect your organization's assets with your employees, mobile workers, and contractors.

MobiKEY subscribers will now be able to use MobiKEY on a Samsung Galaxy S4, Samsung Galaxy Note 3, Samsung Galaxy Note Pro 12.2 and Samsung Galaxy Note 10.1. The MobiKEY technology includes the use of both Route1's universal identity management and service delivery platform, and MobiKEY application software.

MobiKEY Benefits

Security

- Encrypted and mutually authenticated connection to any asset.
- Hardware-based, multi-factor authentication.
- Identity validation and assurance at the highest level.
- No remote nodes added to enterprise network: no endpoint security management required.
- No Data-At-Rest challenges; no data spillage to mobile devices.
- Operates completely clientless and driverless.

Usability

- Plug and play user experience; nothing to install on mobile asset.
- Turnkey setup and easy integration with existing infrastructure.
- Full workspace experience from any device.
- Proven support for VDI; VMware and Citrix ready.

Flexibility

- Annual subscription fee includes maintenance & 24/7 support.
- Device and vendor agnostic. Use any device, anywhere.
- Try and buy, pay-as-you-go options.

"The MobiKEY solution empowers team members to use their own devices without introducing risks to your network or destabilizing your infrastructure. With MobiKEY, no data is stored or cached on any remote device — all data stays within the confines of the organization's network. In fact, remote assets do not even become part of the network, effectively negating the risk of malware and virus propagation and eliminating the need for end point protection," said Route1's President Brian Brunetti. "Further, MobiKEY, powered by MobiNET's PKI-based identity validation service, seamlessly integrates with your

existing infrastructure. It fully supports virtualized environments, such as VMware & Citrix, and integrates with Active Directory.”

To procure MobiKEY, you can email Route1 at sales@route1.com or speak with a Route1 sales representative at 1 (866) 371-1780 or 416-814-2608.

If you are a current subscriber to the MobiKEY technology, MobiKEY for Android is available to you at no additional cost. Customers may contact Route1 technical support for instructions by email at support@route1.com or by telephone at +1 866-371-1781.

Reporting of Q2 and YTD 2015 Financial Results

Route1 will report its second quarter and year-to-date financial results for the period ended June 30, 2015 on Tuesday, August 18, 2015.

ABOUT ROUTE1, INC.

Route1 enables the mobile workspace without compromising on security. Its flagship technology MobiKEY uniquely combines secure mobile access, with high assurance identity validation and plug-and-play usability. Remote and mobile workers are able to securely and cost-effectively access their workspace from any device without exposing the organization to the risk of data spillage or malware propagation. MobiKEY customers include Fortune 500 enterprises as well as the U.S. Department of Defense, the Department of Homeland Security, the Department of Energy and the Government of Canada. Headquartered in Toronto, Canada, Route1 is listed on the TSX Venture Exchange.
