

SUNSET PACIFIC PETROLEUM LTD.

CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
(expressed in Canadian Dollars)

SIX MONTHS ENDED JUNE 30, 2016

MANAGEMENT COMMENTS ON UNAUDITED INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The accompanying unaudited interim consolidated financial statements of Sunset Pacific Petroleum Ltd. for the six months ended June 30, 2016 have been prepared by and are the responsibility of the Company's management. The Company's independent external auditor has not performed a review of these financial statements.

The accompanying notes are an integral part of these consolidated financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated under the British Columbia Company Act (subsequently transitioned under the British Columbia Corporations Act) on May 14, 1981 and is registered extra-provincially in Alberta. The Company's registered office is located at 1100 – 736 Granville Street, Vancouver BC, V6C 1G3.

The Company is a junior resource exploration company engaged in the acquisition, exploration, and development of natural resource properties (primarily oil and gas). The Company and its subsidiaries do not have producing resource properties at this time. The Company's business is presently focused on the exploration and evaluation of various oil and gas properties in British Columbia, Canada.

During the quarter ended June 30, 2016, the Company incurred a loss of \$285,223 (2015: \$293,193 and has an accumulated deficit of \$22,246,388 (December 31, 2015: \$21,526,494). Cash at June 30, 2016 was \$285 (December 31, 2015: \$250,235). The Company had a working capital deficiency of \$1,432,335 at June 30, 2016 (December 31, 2015: \$1,026,621) all of which indicate the existence of a material uncertainty that may cast substantial doubt about the Company's ability to continue as a going concern.

As a junior exploration stage company, the Company is currently unable to self-finance its operations. The ability of the Company to carry on as a going concern and the ultimate recovery of the Company's investment in its oil and gas properties is dependent upon the discovery, development and sale of oil and gas reserves, the ability to joint venture or sell its resource properties and the ability to raise sufficient capital to finance this operation. The Company continues to seek new capital, and will continue to require additional funds to both finance its administrative expenditures and meet its property commitments. The ultimate outcome of these operations cannot presently be determined because they are contingent on future matters. These financial statements do not include the adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Statement of compliance with IFRS

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2015, which have been prepared in accordance with IFRS as issued by the IASB.

These statements were authorized for issuance by the Board of Directors on August 29, 2016.

Basis of measurement

These financial statements have been prepared on an accrual basis and based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars, which is also the functional currency of the Company and its subsidiary.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make estimates, assumptions and judgments that affect the application of policies and reported amounts of assets and liabilities and disclosures of assets and liabilities at the date of the financial statements, along with reported amounts of expenses and net losses during the period. Actual results may differ from these estimates, and as such, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions are recognized in the period in which the estimates are revised and in any future periods affected.

Estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date that could result in a material adjustment to the carrying value of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- The recoverability of oil and gas properties and deferred expenditures incurred on its Canadian projects. The Company's reserve estimates are evaluated annually consistent with NI 51-101 – Standards of Disclosure for Oil and Gas Activities.
- the inputs in accounting for share-based payment transactions in the statement of loss and comprehensive loss (using the Black-Scholes model) including volatility, probable life of options granted, time of exercise of the options and forfeiture rate;

Judgments

Significant accounting judgments that management has made at the financial position reporting date relate to, but are not limited to, the following:

- The recoverability of accounts on the statement of financial position;
- whether a past event has led to a liability that should be recognized in the consolidated statement of financial position or disclosed as a contingent liability;
- the assessment of the Company's ability to continue as a going concern and execute its strategy by funding future working capital requirements.

Basis of consolidation

The consolidated financial statements include the accounts of its wholly owned subsidiary Bighorn Exploration Ltd. (formerly Zarcan Minerals Inc.), a company incorporated under the laws of the Province of British Columbia.

Details of controlled entities are as follows:

	Country of incorporation	Percentage owned*	
		June 30, 2016	June 30, 2015
Bighorn Exploration Ltd. (formerly Zarcan Minerals Inc.)	Canada	100%	100%

*Percentage of voting power is in proportion to ownership.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

Exploration and evaluation expenditures

Exploration and evaluation expenditures, including the costs of acquiring licenses and exploratory drilling are capitalized as either tangible or intangible exploration and evaluation assets according to the nature of the assets acquired. The costs are accumulated in cost centers by well, field or exploration area pending determination of technical and commercial feasibility.

Exploration and evaluation assets are not subject to depletion as these assets are generally not yet producing.

Impairment

As long as the exploration and evaluation assets remain classified as intangible exploration and evaluation assets, they are subject to technical, commercial, and management review, as well as review for indicators of impairment at each reporting period. If there are indicators of impairment, exploration and evaluation assets are tested for impairment at the cash generating unit level. Exploration and evaluation assets are derecognized when the legal right to explore has expired or when the asset is no longer expected to generate value.

The technical feasibility and commercial viability of extracting a resource is considered to be determinable when proved resources are proven to exist. A review of each exploration license or field is carried out, at least annually, to ascertain whether proved reserves have been discovered. Upon determination of proved reserves, exploration and evaluation assets attributable to those reserves are first tested for impairment and then reclassified from exploration and evaluation assets to a separate category within property and equipment referred to as petroleum and natural gas interests.

Development and production costs

Items of property and equipment referred to as petroleum and natural gas interests, which include petroleum and natural gas development and production assets, are measured at cost less accumulated depletion and depreciation and accumulated impairment losses. Development and production assets are grouped into cash generating units for impairment testing. When significant items of property, plant and equipment, including petroleum and natural gas interests, have different useful lives, they are accounted for as separate items.

Gains and losses on disposal of an item of property and equipment, including petroleum and natural gas interests, are determined by comparing the proceeds from disposal with the carrying amount of the property and equipment and are recognized net within “other income” or “other expenses” in the statement of comprehensive income.

Subsequent costs

Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts of property and equipment are recognized as petroleum and natural gas interests only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures are expensed to the statement of comprehensive income as incurred. Such capitalized petroleum and natural gas interests generally represent costs incurred in developing proved and/or probable reserves and bringing in or enhancing production from such reserves, and are accumulated on a field or a geotechnical area basis. The carrying amount of any

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

replaced or sold component is derecognized. The costs of day-to-day servicing of property and equipment are expensed as incurred.

Depletion

The net carrying value of development or production assets is depleted using the units of production method by reference to the units produced in the year as a percentage of the related proved reserves, taking into account estimated future development costs necessary to bring those reserves into production. Future development costs are estimated taking into account the level of development required to produce the reserves.

Reserves are estimated using reserve engineer reports and represent the estimated quantities of crude petroleum, natural gas and natural gas liquids which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs that are determined to be commercially producible. There should be a 90 percent statistical probability that the actual quantity of recoverable reserves will be more than the amount estimated as proved reserves and a 10 percent statistical probability that it will be less. The equivalent statistical probabilities for the probable component of the proved and probable reserves are 50 percent and 50 percent, respectively.

Such reserves may be commercially producible if management has the intention of developing and producing them and such intention is based upon:

- a reasonable assessment of the future economics of such production;
- a reasonable expectation that there is a market for all or substantially all the expected petroleum and natural gas production;
- evidence that necessary production, transmission and transportation facilities are available or can be made available.

Provisions

When the Company has a present legal or constructive obligation as a result of a past event, a provision is recognized only when the obligation is estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the obligation due to the passage of time is recognized as finance expense.

Restoration and environmental obligations

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-term assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future restoration cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to exploration and evaluation assets along with a corresponding increase in the restoration provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The restoration asset will be depreciated on the same basis as other mining assets.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

The Company's estimates of restoration costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to mining assets with a corresponding entry to the restoration provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates.

Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the period.

The net present value of restoration costs arising from subsequent site damage that is incurred on an ongoing basis during production are charged to profit or loss in the period incurred. The costs of restoration projects that were included in the provision are recorded against the provision as incurred. The costs to prevent and control environmental impacts at specific properties are capitalized in accordance with the Company's accounting policy for exploration and evaluation assets.

Revenue Recognition

The Company records royalty revenue in accordance with the contract terms once it can be reliably measured and the collection is reasonably assured.

Share base compensation

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to the statement of comprehensive loss/income over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss/income over the vesting period, described as the period during which all the vesting conditions are to be satisfied.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the statement of comprehensive loss/income, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations.

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss/income over the remaining vesting period.

Financial instruments

The Company designates its financial assets as loans and receivables, available for sale and “fair value through profit and loss”. Financial assets are assessed at each reporting date to determine whether there is objective evidence of impairment. Financial assets designated as loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These assets are comprised of cash, and accounts receivable. These are initially measured at fair value, and then at amortized cost less any impairment. When impaired, the carrying amount is reduced by the impairment loss directly.

The Company has no available-for-sale financial assets, nor any financial assets designated as “fair value through profit or loss”.

The Company’s financial liabilities include accrued liabilities and due to related parties. Subsequent to initial recognition, accrued financial liabilities and due to related parties are measured at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in the income statement over the period to maturity using the effective interest method.

Loans and other financial liabilities are classified as current or non-current based on their maturity date. Financial liabilities include accounts payable, accrued liabilities, and loans.

Derivative financial liabilities are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting period with changes in the fair value recognized in profit and loss. Derivative financial liabilities include warrants issued by the Company denominated in a currency other than the Company’s functional currency.

The required disclosures are included in Note 10.

Basic and Diluted Loss Per Share

Loss per common share is calculated using the weighted average number of common shares issued and outstanding during each year. Diluted loss per common share is calculated using the treasury stock method which assumes that stock options are only exercised when the exercise price is below the average market price during the period, and that the Company will use these proceeds to purchase its common shares at their average market price during the period. In the years when the Company

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

reports a net loss, the effect of potential issuances of shares under options would be anti-dilutive and, therefore, basic and diluted losses per share are the same.

Existing stock options and share purchase warrants have not been included in the computation of diluted loss per share as to do so would be anti-dilutive. Accordingly, basic and diluted loss per share are the same for the years presented.

Comprehensive Loss

Comprehensive loss reflects net loss and other comprehensive income (loss) for the period. Other comprehensive income (loss) includes changes in unrealized foreign currency translation amounts arising from self-sustaining foreign operations, unrealized gains and losses on available-for-sale assets and changes in the fair value of derivatives designated as cash flow hedges to the extent they are effective.

Income Taxes

The Company accounts for income taxes using the asset and liability method, whereby deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted or substantially enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of enactment or substantive enactment. Deferred income tax assets are recognized to the extent that they are considered more likely than not to be realized. The valuation of deferred income tax assets is adjusted, if necessary, by the use of a valuation allowance to reflect the estimated realizable amount.

Warrants

Proceeds from issuances by the Company of units consisting of shares and warrants are allocated based on the residual method, whereby the carrying amount of the warrants is determined based on any difference between gross proceeds and the estimated fair market value of the shares. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants.

Impairment of non-financial assets

The Company assesses at each date of the statement of financial position the carrying amounts of non-financial assets to determine whether there is indication that those assets have incurred an impairment loss. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the assets belong.

Recoverable amount is the greater of the fair value less costs to sell and value in use. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If it is not possible to determine the fair value less costs to sell, the asset's value in use can be used as the recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments for the time value of money and risks specific to the asset. If the recoverable amount of an asset (or cash generating

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of operations and comprehensive loss. Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of the recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior year. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized.

Future accounting changes

The following new standards and interpretations are not yet effective and have not been applied in preparing these financial statements. The Company is currently evaluating the potential impacts of these new standards and does not anticipate any material changes to the financial statements upon adoption of these new and revised accounting pronouncements.

IFRS 9 – Financial Instruments (effective January 1, 2018) introduces new requirements for the classification and measurement of financial assets, and will replace IAS 39. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple classification options available in IAS 39.

IAS 1 – Presentation of Financial Statements (effective January 1, 2016) represents amendments outlining disclosure initiatives relating to materiality, ordering of the notes, subtotals, accounting policies and disaggregation with an aim of clarifying IAS 1 to address perceived impediments to preparers exercising their judgement in presenting their financial reports.

The Company anticipates that the application of these standards, amendments and interpretations will not have a material impact on the results and financial position of the Company.

3. OIL AND NATURAL GAS PROPERTIES

Royalty Interests – Bougie Trutch and Trutch East

On October 14, 2005 the company acquired a 2.5% overriding royalty in the Bougie Trutch oil and gas project in north eastern British Columbia for \$29,000 paid for by the issuance of 100,000 common shares. A total of 5 halfway wells have been drilled on this property. Production from two wells commenced in February 2007 and the production from the third well started in January 2008. Of the remaining two wells one was capped and the other was abandoned.

On November 30, 2006 the company acquired a 2.5% over-riding royalty in the Trutch East natural gas lease package (15 square miles) for \$250,000. Under the terms of the Trutch East Participation Agreement, the Company will have the right to earn a 2.5% rolling over-riding interest in the 15 sections of Trutch East lands. The property has one producing well. Production commenced in February 2007.

3. OIL AND NATURAL GAS PROPERTIES (continued)

At December 31, 2015, management determined that the carrying amount of the Bougie Trutch project was greater than its recoverable amount of \$19,000. The recoverable amount of the property was its value in use as it was not possible to make a reliable estimate of the project's fair value less costs to sell. The value in use was determined using an independent engineering evaluation with a discount rate of 10%.

During the year ended December 31, 2015, the Company wrote off \$6,000 (2014: (\$15,607)) which is included in write down of oil and gas properties on the consolidated statement of operations and comprehensive loss.

CONSOLIDATED SCHEDULE OF OIL AND GAS PROPERTY COSTS

(c) Stock options

The Company has a stock option plan pursuant to which, the Company may grant options to eligible directors and employees of the Company, up to a maximum of 10% of the total number of outstanding common shares. Options may be issued under the stock option plan at the sole discretion of the Company's Board of Directors. The exercise price will be set by the Company's Board of Directors at the time the option is granted, and cannot be less than the discounted market price. Vesting terms of the option will be determined at the discretion of the Board of Directors. Options may be granted for a maximum of ten years from the date of the grant.

The following table provides detailed information about stock options outstanding and exercisable at June 30, 2016

Options Outstanding	Exercise Price	Expiry Date	Weighted Average <u>Remaining Life (years)</u>
1,500,000	\$ 0.07	February 26, 2019	2.66
800,000	0.105	May 15, 2019	2.87
<u>1,022,853</u>	0.15	October 16, 2019	<u>3.29</u>
3,322,853			2.94

The options granted vested on the grant date. The fair value of each option is estimated on the grant date using the Black-Scholes option valuation model assuming no expected dividends. The assumptions used in calculating fair value are as follows:

5. SHARE CAPITAL (continued)

	June 30	
	2016	2015
Share-based compensation	\$ Nil	\$ Nil

7. SEGMENTED INFORMATION

The Company operates within a single operating segment, which is the exploration and development of its oil and gas properties located in British Columbia.

8. CONTINGENT LIABILITIES

(a) The Company may be liable for a claim in the amount of \$75,113 for certain legal expenses with respect to a proposed amalgamation with Canada Gas Corp. The amalgamation was not completed and management is disputing the amount and is in the opinion that the amount owed is \$2,315. The Company has accrued \$nil in relation to this claim.

(b) PricewaterhouseCoopers LLP (“PwC”) has filed a Writ of Summons against the company for \$52,125 in uncollected fees plus 6% interest on the outstanding fees, and any cost associated with collecting these fees. On November 18, 2011, judgment was awarded to PwC in the full amount of \$52,125 plus 6% interest on the judgment awarded and costs. On November 25, 2011, the Company filed an Appeal with the Court of Appeal.

The Company has recorded the debt and interest as accounts payable and included the interest in accrued liabilities.

(c) Synterra Technologies Ltd. Filed a claim against the Company in the amount of \$18,780.04 for the consulting services provided. Management has decided to settle the claim by negotiating it with the plaintiff in the amount of \$10,000.

The Company has recorded the debt in accounts payable.

(d) Ah Twelve Holdings Ltd filed a Notice of Civil Claim against the Company in the amount of \$38,886.28 for the outstanding rent payments on December 13, 2013. Management has determined that it is probably that an outflow of cash for the above stated amount will be required to settle the obligation.

The Company has recorded the debt in accounts payable and has made payments totaling \$6,000 during 2016

9. MANAGEMENT OF CAPITAL

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company in order to support the acquisition, exploration and development of mineral properties and to maintain the Company in good standing with the various regulatory authorities.

The properties in which the Company currently has an interest in are in the exploration stage, as such, the Company does not recognize revenue from its exploration properties. The Company's historical sources of capital have consisted of the sale of equity securities and interest income. In order for the Company to carry out planned exploration and development and pay for administrative costs, the Company will spend its working capital and raise additional amounts externally as needed.

The Company has policies and procedures in place for employee and officer expenditure authorization limits and capital expenditure authorization. Management reviews its capital management approach on an ongoing basis and believes this approach, given the size of the Company, is reasonable.

10. FINANCIAL INSTRUMENTS

The Company's financial instruments at June 30, 2016 consist of cash, accounts receivable, accounts payable and accrued liabilities, and loans payable. Cash is carried at fair value using a level 1 fair value measurement. The carrying value of accounts receivable, due to related parties, accounts payable and accrued liabilities, and loans payable approximate their fair value because of their nature and respective maturity dates or durations.

The risk exposure is summarized as follows:

Credit Risk

The Company is not exposed to any significant credit risk on its financial assets. Cash consists of cash on hand have been invested with reputable financial institutions and funds in trust have been held with trustworthy legal firms, from which management believes the risk of loss to be remote. As at June 30, 2016, the Company had no financial assets that were either past due or impaired.

Liquidity Risk

The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to settle obligations and liabilities when due. As at June 30, 2016, the Company had a cash of \$285 to settle current liabilities of \$1,446,949 which mainly consist of accounts payable and accrued liabilities and loans payable that are considered short term.
