# CVR Medical Provides Update on its Thomas Jefferson University Clinical Trials

**VANCOUVER, BC / ACCESSWIRE / April 25, 2017 /** CVR Medical Corp. **(CVM.V)** ("**CVR Medical**") announces update on clinical trials of the "Carotid Stenotic Scan (CSS)," currently being conducted through the Jefferson Clinical Research Institute at Thomas Jefferson University under the supervision of Dr. David J. Whellan.

"Enrollment was initiated in early January," says Dr. Whellan. "The prototype device, which is being operated in standard form, will soon be joined by its wireless charging technology, for which preparation has gone smoothly. The CSS, as a whole, has been widely praised for its ease of use. The training required was straightforward and allowed the coordinators to quickly gain experience and implement the study. Since its successful implementation, we have had steadily growing enrollment. We're looking forward to continuing our work with CVR."

CVR CEO Peter Bakema states, "We are pleased with the progress of the ongoing clinical trials, for which enrollment has exceeded our expectation thus far. We are also happy to share the expected inclusion of the wireless charging device going forward. The simplicity and freedom it provides will serve to further enhance the application of the CSS. We are excited for the continuation of our work with Thomas Jefferson University, where implementation of four additional wired CSS devices will be immediately placed across the Thomas Jefferson University footprint, with multiple wireless devices close behind."

*This press release contains forward-looking information that involves various risks and uncertainties regarding future events related to the Joint Venture. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements and are not guarantees of future performance of the Company. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions which may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions in North America and internationally, (2) the inherent uncertainties and speculative nature associated with commercialization of technology and the practice of medicine, (3) a change in health regulations, (4) any number of events or causes which may delay or cease commercialization and development of the Joint Venture, (5) the risk that the Company or the Joint Venture does not execute its business plan, (6) inability to retain key employees, (7) inability to finance operations and growth, and (8) other factors beyond the Company's control. These forward-looking statements are made as of the date of this news release and, except as required by law, the Company assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements.*
