

## EnWave and Bridgford Foods Sign Commercial License Agreement to Produce Military Ration Components

VANCOUVER, British Columbia, June 22, 2023 -- **EnWave Corporation (TSX-V:ENW | FSE:E4U) ("EnWave", or the "Company")** a global leader in vacuum-microwave dehydration technology, has announced the signing of a royalty-bearing commercial license (the "License") with Bridgford Foods Corporation (NASDAQ: BRID) ("Bridgford") a leading American food production company, for the manufacture of certain military ration products using EnWave's innovative Radiant Energy Vacuum ("REV™") dehydration technology. The exclusive license granted to Bridgford will enable the company to leverage the full potential of REV™ technology to produce certain military ration products in the United States of America. Bridgford has also purchased a 120kW REV™ machine.

EnWave's partnership with Bridgford is supported by a manufacturing technology grant, which will guarantee the U.S. Department of Defense certain REV™ manufacturing capacity at Bridgford's facility to supply close combat field rations.

In addition to military ration products, Bridgford will also leverage REV™ technology to develop additional consumer-branded products at their North Carolina facility. The 120kW REV™ dehydration machine sold to Bridgford is expected to be commissioned within 2023. EnWave plans to continue close collaboration with Bridgford to expedite the development of new commercial products, which will be added to Bridgford's License in due course. With Bridgford's established presence in California, Texas, Illinois, and North Carolina, EnWave is confident that this partnership should lead to significant growth opportunities for both companies.

### About Bridgford Foods

Bridgford Foods Corporation, a California corporation, was organized in 1952. Bridgford originally began operations in 1932 as a retail meat market in San Diego, California and evolved into a meat wholesaler for hotels and restaurants, a distributor of frozen food products, a processor and packer of meat, and a manufacturer and distributor of frozen food products for sale on a retail and wholesale basis. Currently, Bridgford and its subsidiaries are primarily engaged in the manufacturing, marketing and distribution of an extensive line of frozen and snack food products throughout the United States.

For over 90 years, the mission of Bridgford Foods Corporation has been to develop, produce, sell and distribute superior quality food products that provide a consistent value to their customers. Bridgford adheres to the highest ethical standards. They treat their customers and employees with honesty, respect, dignity and appreciation. Bridgford believes that they wrap their future in every package, and they stand behind the products they sell 100%. Bridgford believes that innovation is essential to the future success of their business, and they strive to be industry trendsetters in the development of new products.

### About EnWave

EnWave is a global leader in the innovation and application of vacuum microwave dehydration. From its headquarters in Vancouver, BC, EnWave has developed a robust intellectual property portfolio, perfected its Radiant Energy Vacuum (REV™) technology, and transformed an innovative idea into a proven, consistent, and scalable drying solution for the food, pharmaceutical and cannabis industries that vastly outperforms traditional drying methods in efficiency, capacity, product quality, and cost.

With more than fifty royalty-generating partners spanning twenty countries and five continents, EnWave's licensed partners are creating profitable, never-before-seen snacks and ingredients, improving the quality and consistency of their existing offerings, running leaner and getting to market faster with the company's patented technology, licensed machinery, and expert guidance.

EnWave's strategy is to sign royalty-bearing commercial licenses with food and cannabis producers who want to dry better, faster and more economical than freeze drying, rack drying and air drying, and enjoy the following benefits:

- Food and ingredients companies can produce exciting new products, reach optimal moisture levels up to seven times faster, and improve product taste, texture, color and nutritional value.
- Cannabis producers can dry four to six times faster, retain up to 20% more terpenes and 25% more cannabinoids, and achieve at least a 3-log reduction in crop-destroying microbes.

*Safe Harbour for Forward-Looking Information Statements: This press release may contain forward-looking information based on management's expectations, estimates and projections. All statements that address expectations or projections about the future, including statements about the Company's strategy for growth, product development, market position, expected expenditures, the Company ceasing to make investments in NutraDried, the timing of the wind-down and dissolution of NutraDried, expectations around the cost of winding down NutraDried, and the Company's intended focus for the future are forward-looking statements. These statements are not a guarantee of future performance and involve a number of risks, uncertainties and assumptions. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended, including that the process of winding up NutraDried will involve time and expense to the Company materially greater than anticipated, that the realization of assets of NutraDried will not sufficiently cover the orderly wind-up of NutraDried, which could result in the requirement for additional funding by the Company to complete such wind-up, that the foregoing developments will adversely affect the Company, in terms of cost, management time and focus, outlook or reputation; the ability of the Company to achieve its longer-term outlook, the ability to lower costs, and the other risk factors set forth in the Company's public filings. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.*
