

This is a form of a material change report required under Section 85(1) of the Securities Act and Section 151 of the Securities Rules.

FORM 27

Securities Act

MATERIAL CHANGE REPORT UNDER SECTION 85(1) OF THE ACT

NOTE: This form is intended as a guideline. A letter or other document may be used if the substantive requirements of this form are complied with.

NOTE: Every report required to be filed under Section 85(1) of the Act shall be sent to the Commission in an envelope addressed to the Commission and marked "Continuous Disclosure".

NOTE: WHERE THIS REPORT IS FILED ON A CONFIDENTIAL BASIS PUT AT THE BEGINNING OF THE REPORT IN BLOCK CAPITALS "CONFIDENTIAL - SECTION 85", AND EVERYTHING THAT IS REQUIRED TO BE FILED SHALL BE PLACED IN AN ENVELOPE ADDRESSED TO THE SECRETARY OF THE COMMISSION MARKED "CONFIDENTIAL".

Item 1. **Reporting Issuer**

WSI Interactive Corp.

Item 2. **Date of Material Change**

April 7, 2000

Item 3. **Press Release**

The press release was issued on April 7, 2000 and disseminated through Canada News Wire and BC Emergis and Canadian Corporate News.

Item 4. **Summary of Material Change**

At a press conference held today at the Spring Internet World 2000 in Los Angeles, WSi Interactive Corporation demonstrated the wireless streamed video transmission capabilities of the broadband network that it has acquired certain exclusive rights to from Global Communications.

Item 5. Full Description of Material Change

At a press conference held today at the Spring Internet World 2000 in Los Angeles, WSi Interactive Corporation demonstrated the wireless streamed video transmission capabilities of the broadband network that it has acquired certain exclusive rights to from Global Communications.

WSi is planning to be a key player in the broadband network arena, which offers unparalleled bi-lateral transmission speed to accommodate High Definition TV transmission over a global broadband network. It is the convergence of the Internet information content with high quality TV and Telephony transmission that forms the nucleus of WSi's vision for the future of the "new" Internet.

A wireless and fiber broadband intranet with seamless access to the Internet offers many advantages for WSi over the traditional web; the most important being that WSi will be able to do true multicasting at very high speeds and send High Definition Television through the broadband network. This is not possible over the existing Internet for two reasons: 1. Internet access to the home or business, in most cases is not at the transmission capability required to deliver HDTV. 2. The current architecture of the Internet today does not accommodate a multi-cast signal to the end user due to incompatibility issues that result from having to send a signal across multiple ISP's.

Mat Matson, President of Global Communications said at the conference, "It is because we share WSi's vision of the future that we are excited to be working with them. The combination of WSi's Internet business and marketing acumen combined with Global's fiber network, software and technology will create boundless opportunity for business growth for WSi".

Other companies providing wireless services include Metricom (Nasdaq:MCOM), Global Crossing (Nasdaq:GLBX).

Global Communications transmission speed is up to 30.5Mbps directly to every user of its network. This is three times faster than the yet to be delivered high-speed cable systems. Global guarantees a speed equivalent to a bi-directional T-1 at all times to a household or business using Global's communication network. It ensures that each user has the ability to make or receive a minimum of 3 simultaneous video (TV quality) phone calls, plus an array of standard voice and data transmissions all at the same time. In addition, High Definition Television, movies, and stereo/hi-fidelity radio are also available over the Global Communications network due to its guaranteed line speed.

It should be noted that the transaction between WSi and Global is at the due diligence stage. The Company has secured the exclusive rights to use Global Communication's technology in certain jurisdictions, but it has not yet completed the transactions pending due diligence completion and the negotiation of definitive licence agreements. The cost of implementing the technology is significant and Management of WSi will have to consider many factors before a definitive commitment is made to proceed with this project. When a decision will be made to commit or not commit to the technology, the Company will issue a news release accordingly.

Item 6. Reliance on Section 85(2) of the Act

Nothing in this form is required to be maintained on a confidential basis.

Item 7. Omitted Information

Not applicable.

Item 8. Senior Officer

James L. Harris, Secretary

Telephone No. (604) 609-3068

Item 9. Statement of Senior Officer

The foregoing accurately discloses the material change referred to herein.

DATED this 10th day of April, 2000 at Vancouver, B.C. WSI Interactive Corp.
