NATIONAL INSTRUMENT 51-101F1

***STATEMENT OF RESERVES DATA AND
OTHER OIL AND GAS INFORMATION***

As at June 30, 2010

STATEMENT OF RESERVES DATA AND OTHER OIL & GAS INFORMATION

As at June 30, 2010

This statement of reserves data and other information (the "Statement") is dated October 27th, 2010 and is effective June 30, 2010. The information regarding reserves in the Statement was prepared between June and October, 2010.

The future net revenue numbers presented throughout this Statement, whether calculated without discount or using a discount rate, are estimated values and do not represent fair market value. There is no assurance that the price and cost assumptions will be attained and variances could be material.

Disclosure of Reserves Data

In accordance with National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities, MKM Engineering ("MKM") prepared a report (the "Reserves Report") dated October 7, 2010. The Reserves Report evaluated, as at June 30, 2010, Gale Force Petroleum Inc.'s oil and natural gas reserves.

The tables summarize the data contained the Reserves Report and as a result, may contain slightly different numbers than those reports due to rounding. There is no assurance that the price and cost assumptions set out below will be attained and variances could be material. The reserve estimates provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual reserves may be greater than or less than the estimates provided herein.

All of the Company's properties, reserves and production are located in the States Texas, Oklahoma and Tennessee.

All dollar amounts herein are in United States dollars, unless otherwise stated.

The following tables detail the aggregate gross and net reserves of the Company, as at June 30, 2010, using forecast prices and costs as well as the aggregate net present value of future net revenue attributable to the reserves estimated using forecast prices and costs, calculated without discount and using discount rates of 5%, 10%, 15% and 20%:

SUMMARY OF OIL AND GAS RESERVES AS OF JUNE 30, 2010 FORECAST PRICES AND COSTS

Reserves Category	Light and Medium Oil		Natural Gas (non-associated and associated)	
	Gross (Mbbbl)	Net (Mbbbl)	Gross (MMcf)	Net (Mbbbl)
Proved Developed Producing	228	184	241	188
Proved Developed Non-Producing	641	503	83	65
Proved Undeveloped	120	95	675	532
Total Proved	989	782	999	785
Probable	3	2	-	-
Total Proved Plus Probable	992	784	999	785

**NET PRESENT VALUES OF FUTURE NET REVENUE
AS OF JUNE 30, 2010
FORECAST PRICES AND COSTS**

Reserves Category	Net Present Values Of Future Net Revenue (\$000s)										Future Net Val 10%/yr (\$/BOE)
	Before Income Taxes Discounted At (%/year)					After Income Taxes Discounted at (%/year)

The following table provides a breakdown of various elements of future net revenue attributable to *Proved* reserves and *Proved plus Probable* reserves of the Company using forecast prices and costs and calculated with discount:

**TOTAL FUTURE NET REVENUE (UNDISCOUNTED)
AS OF JUNE 30, 2010
FORECAST PRICES AND COSTS**

Reserves Category	Revenue (\$000s)	Royalties (\$000s)	Operating Costs (\$000s)	Development Costs (\$000s)	Abandonment Costs (\$000s)	Future Net Revenue Before Income Taxes (\$000s)	Future Net Revenue After Future Income Taxes (\$000s)
Proved	97,474	20,591	24,806	3,730	431	47,916	19,456
Proved Plus Probable	97,674	20,628	24,886	3,753	440	47,969	19,477

The following table details by production group the net present value of future net revenue (before deducting future income tax expenses) estimated using forecast prices and costs and calculated using a discount rate of 10%:

**FUTURE NET REVENUE BY PRODUCTION GROUP
AS OF JUNE 30, 2010
FORECAST PRICES AND COSTS**

Reserves Category	Production Group	Future Net Revenue Before Income Taxes (discounted at 10%/year) (\$000s)	Unit Value Before Income Taxes (Discounted at 10%/year) (\$/BOE)
Proved	Light and Medium Crude Oil (including solution gas and other by-products)	22,886	29.28
	Natural Gas (including associated by-products)	2,263	17.29
Proved Plus Probable	Light and Medium Crude Oil (including solution gas and other by-products)	22,926	29.24
	Natural Gas (including associated by-products)	2,262	17.28

Pricing Assumptions

The following table details the benchmark reference prices for the regions in which the Company as at June 30, 2010 reflected in the reserve data disclosed under “Statement of Reserves Data and Other Oil and Gas Information – Disclosure of Reserves Data”. These pricing assumptions were taken from the forecast prices as at June 30, 2010 provided by Sproule Associates Limited, which are independent qualified reserves evaluators and auditors.

SUMMARY OF PRICING AND INFLATION RATE ASSUMPTIONS AS AT JUNE 30, 2010 FORECAST PRICES AND COSTS

Year	WTI Cushing Oklahoma (\$US/bbl)	NATURAL GAS (\$US/Mcf)	INFLATION RATES ⁽¹⁾ %/Year	EXCHANGE RATE ⁽²⁾ (\$US/\$Cdn)
Historical:				
2008	99.57	13.89	-	-
2009	61.66	11.96	-	-
Forecast:				
2010	76.77	4.37	1.5	1.0
2011	80.46	4.92	1.5	1.0
2012	82.72	5.27	1.5	1.0
2013	86.47	6.49	1.5	1.0
2014	90.22	7.61	1.5	1.0
2015	91.57	7.74	1.5	1.0
2016	92.94	7.91	1.5	1.0
2017	94.34	8.04	1.5	1.0
2018	95.75	8.18	1.5	1.0
2019	97.19	8.31	1.5	1.0
2020	98.65	8.45	1.5	1.0
Thereafter	106.65	9.17	1.5	1.0

(1) Inflation rates for forecasting costs.

(2) Exchange rates used to generate the benchmark reference prices in this table.

Reconciliations of Changes in Reserves and Future Net Revenue

The following table outlines the reconciliation of changes in the net reserves estimates for the Company for the period from June 30, 2009 to June 30, 2010, using forecast prices and costs.

RECONCILIATION OF CORPORATION GROSS RESERVES (BEFORE ROYALTY) AS AT JUNE 30, 2010 FORECAST PRICES AND COSTS

FACTORS	LIGHT AND MEDIUM OIL			NATURAL GAS		
	Proved (bbl)	Probable (bbl)	Proved Plus Probable (bbl)	Proved (Mcf)	Probable (Mcf)	Proved Plus Probable (Mcf)
June 30, 2009	0	0	0	0	0	0

Production	-3.3	-	-	-	-	-
June 30, 2010	9889	3	992	999	-	999

Significant Factors or Uncertainties

The process of estimating reserves is complex. It requires significant judgments and decisions based on available geological, geophysical, engineering, and economic data. These estimates may change substantially as additional data from ongoing development activities and production performance becomes available and as economic conditions impacting oil and gas prices and costs change. The reserve estimates contained herein are based on current production forecasts, prices and economic conditions. The Company's reserves are evaluated by MKM Engineering, an independent engineering firm. As circumstances change and additional data become available, reserve estimates also change. Estimates made are reviewed and revised, either upward or downward, as warranted by the new information. Revisions are often required due to changes in well performance, prices, economic conditions and governmental restrictions. Although every reasonable effort is made to ensure that reserve estimates are accurate, reserve estimation is an inferential science. As a result, the subjective decisions, new geological or production information and a changing environment may impact these estimates. Revisions to reserve estimates can arise from changes in year-end oil and gas prices, and reservoir performance. Such revisions can be either positive or negative. These factors and uncertainties shall be discussed in greater detail in the Company's annual financial statements and management discussion and analysis for the period ended June 30, 2010.

Future Development Costs

The following table details the development costs deducted in the estimation of future net revenue attributable to proved and proved plus probable reserves of the Company (estimated using forecast prices and costs):

FUTURE DEVELOPMENT COSTS FORECAST AS AT JUNE 30, 2010

Year	Proved Reserves (\$000s)	Proved and Probable Reserves (\$000s)	Total (\$000s)
2010	1,029	-	1,029
2011	1,945	29	1,983
2012	435	27	462
Thereafter	223	56	279

The Company's source of funding for future development cost of the Company's reserves will be derived from a combination of cash-flow, debt, new equity financing, farm-outs or similar arrangements. Management of the Company does not anticipate that the costs of funding referred to above will materially affect the Company's disclosed reserves and future net reserves or will make the development of any of the Company's properties uneconomic.

Undeveloped Reserves

The Company attributed *Proved Undeveloped* reserves for three well locations in Central Oklahoma, as described in section 6.1 below. The three wells will be drilled to the Bromide during the next 20 months. These *proved undeveloped reserves* were determined by analogy to offset wells. These reserves represent approximately 12% of total *proved* oil reserves and 68% of total *proved* natural gas reserves.

PROVED UNDEVELOPED GROSS RESERVES VOLUMES YEAR OF ATTRIBUTION OF RESERVES AS AT JUNE 30, 2010

Year	Light and Medium Oil				Natural Gas (non-associated and associated)			
	1 st Attributed (Mbbbl)	Revised (Mbbbl)	Dispositions (Mbbbl)	Booked (Mbbbl)	1 st Attributed (Mbbbl)	Revised (Mbbbl)	Dispositions (Mbbbl)	Booked (Mbbbl)
Prior to 2008	-	-	-	-	-	-	-	-
2008	-	-	-	-	-	-	-	-
2009	-	-	-	-	-	-	-	-
2010	120	-	-	120	532	-	-	532

Oil and Gas Properties and Wells

All the Company's properties are located onshore in mature basins, and therefore forecast production has low decline rates and relatively high predictability of reservoir performance.

Oklahoma Properties

With respect to the Company's properties in Oklahoma, the *Proved Developed Producing* reserves are located in the central part of the State in Garvin County; the *Proved Developed Non-Producing* reserves are in Seminole and Potawatomie Counties, Oklahoma.

Texas Properties

With respect to the Company's properties in East Texas, the *Proved Developed Producing* reserves are primarily in Wood County, Texas, while the *Proved Developed Non-producing properties* are primarily in Gregg and Rusk Counties, TX.

Tennessee

The Company also has a non-operated interest in some *Proved Developed Producing* reserves in Overton County, Tennessee.

Non-producing Properties

The properties in which reserves were attributed, but are not currently producing, have not produced in several years. The primary reason is neglect of the operator, not reservoir restrictions or other limitations. The Company has plans to reactive those wells mechanically and then subsequently rework them, add stimulation, and then may eventually commence water-flooding.

Location and Type of Wells

In Texas, the production is approximately 99% crude oil. In Oklahoma the production is approximately 60% gas and 40% oil. The following table summarizes the gross and net wells held by the Company as at June 30, 2010:

SUMMARY OF GROSS AND NET PRODUCING AND NON-PRODUCING WELLS AS AT JUNE 30, 2010

WELL TYPE	OKLAHOMA	TEXAS	TENNESSEE	KENTUCKY	TOTAL
Gross Producing Oil Wells	2.00	15.00	5.00	-	22.00
Gross Producing Gas Wells	2.00	-	-	-	2.00
Total Gross Producing Wells⁽¹⁾	4.00	15.00	5.00	0	24.00
Gross Non-Producing Wells	11.00	82.00	-	9.00	102.00
TOTAL Gross Wells	15.00	97.00	5.00	9.00	126.00
Net Producing Oil Wells	1.71	11.74	1.00	-	14.45
Net Producing Gas Wells	1.90	11.00	-	-	14.61
Total Net Producing Wells⁽¹⁾	3.61	11.76	1.00	-	16.37
Net Non-Producing Wells	10.29	72.97	-	4.50	87.76
TOTAL Net Wells	13.90	84.73	1.00	4.50	104.12

Properties with No Attributed Reserves

As at June 30, 2010, the Company did not hold any properties in Oklahoma or Texas of which there are no reserves attributed. However, the Company owned a 50% working interest in an onshore property with approximately 7,000 gross acres (3,500 net acres) in and around Morgan County, Kentucky, with nine wells and a gathering line system connected to a pipeline.

Forward Contracts

The Company sells the crude oil it produces to a variety to purchasers on a month to month basis. The Company sells its gas to OneOk Gas Pipeline on a monthly pricing basis, with no minimum sales requirements.

Additional Information Concerning Abandonment and Reclamation Costs

The Company performs an initial review and environmental study assessing any abandonment retirement obligations when it purchases each property. Additional, the Company conducts an annual review of its forecast abandonment costs. The initial and annual review considers the following factors in assessing liability: well depth, nature of the production stream, the nature, location and condition of the surface lease, age of the well and/or facility, number of zones to be abandoned, and presence of salvageable equipment such as tanks, tubing, and rods. The Company owns a total 104.12 net well, which will eventually need to be abandoned. The costs of Abandonment of these wells are determined net of salvage, and were estimated as at June 30, 2010, in the aggregate, using an inflation rate for costs of 3% and a discount rate of 10%, to have a present value of CA\$848,513, none of which is expected to be incurred in the next three years.

Tax Horizon

The Company has a tax loss carry forward from prior years, and does not forecast having any taxable income until after the completion of the 2012 tax year.

Costs Incurred

All properties owned by the Company are in the United States. During the year ended June 30, 2010, the Company acquired properties in a series of five acquisitions, costing a total CA\$3,814,373. The Company also incurred CA\$780,885 in development costs on the properties it purchased.

The following table summarizes the capital expenditures related to the Company's activities for the year ended June 30, 2010:

SUMMARY OF CAPITAL EXPENSES, FIXED ASSETS FOR THE YEAR ENDED JUNE 30, 2010

	Exploration (\$000s)	Development (\$000s)	Total (\$000s)
Property Acquisitions	-	3,814	3,814
Land or Drilling , Completion, Tie-ins New Wells	-	-	-
Development Existing Wells	-	780	780
Facilities	-	-	-
TOTAL	-	4,595	4,595

Exploration and Development Activities

No drilling was performed during the year ended June 30, 2010, either developmental or exploratory.

Production Estimates

The Company did not have any oil or natural gas production until it concluded acquisitions in May, 2010, with an effective date of March 1, 2010. During the year ended June 30, 2010, the Company produced in the aggregate 3,231 bbls of crude oil and 7,521 mcf of natural gas. The Pine Mills Field in Wood County, Texas, accounted for over 80% of this oil production and the Central Oklahoma properties accounted for all natural gas production.

In the remaining six months of 2010, it is estimated that the Company will produce 17,650 bbls of crude oil and 8,470 Mcfs of natural gas. In 2001, it is estimated that the Company will produce 77,650 bbls of crude oil and 39,320 Mcfs of natural gas.

Production History

The following table summarizes the production history of the Company for the year ended June 30, 2010, by providing average daily production, sales and cost information per barrel or mcf, net to the Company's working interests (prices and costs shown in US dollars):

SUMMARY OF NET PRODUCTION HISTORY, NETBACKS FOR THE YEAR ENDED JUNE 30, 2010

	Central Oklahoma		East Texas		Tennessee	TOTAL	
	Light & Medium Oil (bbls)	Natural Gas (mcfs)	Light & Medium Oil (bbls)	Natural Gas (mcfs)	Light & Medium Oil (bbls)	Light & Medium Oil (bbls)	Natural Gas (mcfs)
Avg. Daily Production	18.34	250.71	73.16	-	16.22	107.73	250.71
Price	78.00	4.84	60.12	-	72.42	65.01	4.84
Royalties & Taxes	5.63	0.35	2.77	-	2.17	3.17	0.35
Production Costs	25.70	0.57	14.30	-	1.31	14.29	0.57
Netback	46.66	3.92	43.04	-	68.93	47.55	3.92

Note that the Company has had limited production history with its wells on production, so future production costs could vary material from the data presented here.

DEFINITIONS, NOTES AND OTHER CAUTIONARY STATEMENTS

In this document, the abbreviations set forth below have the following meanings:

bbl	Barrel.
bbl/d	Barrels per day.
Mbbl	Thousands of barrels.
Mcf	Thousand cubic feet.
Mcf/d	Thousand cubic feet per day.
BOEs	Barrel of Oil Equivalent. Note that BOEs may be misleading, particularly if used in isolation. The BOE conversion ratio of 6 Mcf:1 bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.
°API	An indication of the specific gravity of crude oil measured on the API gravity scale. Liquid petroleum with a specified gravity of 28° API or higher is generally referred to as light crude oil.
\$000s	Thousands of dollars.
WTI	West Texas Intermediate, the reference price paid in U.S. dollars at Cushing, Oklahoma for crude oil of standard grade

Certain terms used herein but not defined herein are defined in NI 51-101 and shall have the same meanings herein as in NI 51-101. The following words and phrases have the following meanings, unless the context otherwise requires:

"Abandonment costs" means costs of abandoning a well and surface lease reclamation. They do not include costs of abandoning the gathering system, suspended wells, batteries, plants, or processing facilities.

"COGEH" means the Canadian Oil and Gas Evaluation Handbook prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum;

"Development costs" means costs incurred to obtain access to reserves and to provide facilities for extracting, treating, gathering and storing the oil and gas from reserves. More specifically, development costs, including applicable operating costs of support equipment and facilities and other costs of development activities, are costs incurred to:

- (a) gain access to and prepare well locations for drilling, including surveying well locations for the purpose of determining specific development drilling sites, clearing ground draining, road building, and relocating public roads, gas lines and power lines, pumping equipment and wellhead assembly;
- (b) drill and equip development wells, development type stratigraphic test wells and service wells, including the costs of platforms and of well equipment such as casing, tubing, pumping equipment and wellhead assembly;
- (c) acquire, construct and install production facilities such as flow lines, separators, treaters, heaters, manifolds, measuring devices and production storage tanks, natural gas cycling and processing plants, and central utility and waste disposal systems; and
- (d) provide improved recovery systems.

"**Exploration costs**" means costs incurred in identifying areas that may warrant examination and in examining specific areas that are considered to have prospects that may contain oil and gas reserves, including costs of drilling exploratory wells and exploratory type stratigraphic test wells. Exploration costs may be incurred both before acquiring the related property and after acquiring the property. Exploration costs, which include applicable operating costs of support equipment and facilities and other costs of exploration activities, are:

- (a) costs of topographical, geo-chemical, geological and geophysical studies, rights of access to properties to conduct those studies, and salaries and other expenses of geologists, geophysical crews and others conducting those studies;
- (b) costs of carrying and retaining unproved properties, such as delay rentals, taxes (other than income and capital taxes) on properties, legal costs for title defence, and the maintenance of land and lease records;
- (c) dry hole contributions and bottom hole contributions;
- (d) costs of drilling and equipping exploratory wells; and
- (e) costs of drilling exploratory type stratigraphic test wells.

"**Gross**" means:

- (a) in relation to the Company's interest in production and reserves, its "Company gross reserves", which are the Company's interest (operating and non-operating) share before deduction of royalties and without including any royalty interest of the Company;
- (b) in relation to wells, the total number of wells in which the Company has an interest; and
- (c) in relation to properties, the total area of properties in which the Company has an interest.

"**Net**" means:

- (a) in relation to the Company's interest in production and reserves, the Company's interest (operating and non-operating) share after deduction of royalties obligations, plus the Company's royalty interest in production or reserves.
- (b) in relation to wells, the number of wells obtained by aggregating the Company's working interest in each of its gross wells; and
- (c) in relation to the Company's interest in a property, the total area in which the Company has an interest multiplied by the working interest owned by the Company.

"**NI 51-101**" means National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities;

"**Operating costs**" or "**production costs**" means costs incurred to operate and maintain wells and related equipment and facilities, including applicable operating costs of support equipment and facilities and other costs of operating and maintaining those wells and related equipment and facilities.

"**Property**" includes:

- (a) fee ownership or a lease, concession, agreement, permit, licence or other interest representing the right to extract oil or gas subject to such terms as may be imposed by the conveyance of that interest;
- (b) royalty interests, production payments payable in oil or gas, and other non-operating interests in properties operated by others; and
- (c) an agreement with a foreign government or authority under which a reporting issuer participates in

the operation of properties or otherwise serves as “producer” of the underlying reserves (in contrast to being an independent purchaser, broker, dealer or importer).

A property does not include supply agreements, or contracts that represent a right to purchase, rather than extract, oil or gas.

“Property acquisition costs” means costs incurred to acquire a property (directly by purchase or lease or indirectly by acquiring another corporate entity with an interest in the property), including:

- (a) costs of lease bonuses and options to purchase or lease a property;
- (b) the portion of the costs applicable to hydrocarbons when land including rights to hydrocarbons is purchased in fee;
- (c) brokers’ fees, recording fees, legal costs and other costs incurred in acquiring properties.

“Reserves” are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations, from a given date forward, based on (a) analysis of drilling, geological, geophysical, and engineering data; (b) the use of established technology; and (c) specified economic conditions, which are generally accepted as being reasonable and shall be disclosed; and (d) a remaining reserve life of 50 years. Reserves are classified according to the degree of certainty associated with the estimates. Reserves categories are:

“Proved” reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.

“Developed Producing” reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.

“Developed Non-Producing” reserves are those reserves that either have not been on production, or have previously been on production, but are shut-in, and the date of resumption of production is unknown.

“Undeveloped” reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned. In multi-well pools, it may be appropriate to allocate total pool reserves between the developed and undeveloped categories or to sub-divide the developed reserves for the pool between developed producing and developed non-producing. This allocation should be based on the estimator’s assessment as to the reserves that will be recorded from specific wells, facilities and completion intervals in the pool and their respective development and production status.

“Probable” reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved + probable reserves.

FORWARD-LOOKING STATEMENTS

Certain of the statements contained herein including, without limitation, financial and business prospects and financial outlook, reserve and production estimates, drilling and re-completion plans, timing of drilling, re-completion and tie-in of wells, productive capacity of wells and productive capacity of wells and capital expenditures and the timing thereof may be forward-looking statements. Words such as "may", "will", "should", "could", "anticipate", "believe", "expect", "estimate", "forecast", "intend", "plan", "potential", "continue" and similar expressions may be used to identify these forward-looking statements. These statements reflect management's current beliefs and are based on information currently available to management. Forward-looking statements involve significant risk and uncertainties. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements including, but not limited to, risks associated with oil and gas exploration, development, exploitation, production, marketing and transportation, loss of markets, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other producers, inability to retain drilling rigs and other services, incorrect assessment of the value of acquisitions, failure to realize the anticipated benefits of acquisitions, delays resulting from or inability to obtain required regulatory approvals and ability to access sufficient capital from internal and external sources and the risk factors outlined under "Risk Factors" and elsewhere herein. The recovery and reserve estimates of the Company's reserves provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. As a consequence, actual results may differ materially from those anticipated in the forward-looking statements. Readers are cautioned that the foregoing list of factors is not exhausted. Additional information on these and other factors that could affect the Company's operations and financial results are included in reports on file with Canadian securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com). Although the forward-looking statements contained herein are based upon what management believes to be reasonable assumptions, management cannot assure that actual results will be consistent with these forward-looking statements. Investors should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date hereof and the Company assumes no obligation to update or review them to reflect new events or circumstances except as required by applicable securities laws.

Forward-looking statements and other information contained herein concerning the oil and gas industry and the Company's general expectations concerning this industry is based on estimates prepared by management using data from publicly available industry sources as well as from reserve reports, market research and industry analysis and on assumptions based on data and knowledge of this industry which the Company believes to be reasonable. However, this data is inherently imprecise, although generally indicative of relative market positions, market shares and performance characteristics. While the Company is not aware of any misstatements regarding any industry data presented herein, the industry involves risks and uncertainties and is subject to change based on various factors.

**REPORT ON RESERVES DATA BY INDEPENDENT QUALIFIED RESEVES EVALUATOR OR
AUDITOR**

To the Board of Directors of Gale Force Petroleum Inc., hereinafter referred to as (the "Company"):

1. We have evaluated the Company's Reserves Data as at June 30, 2010. The reserves data are estimates of proved reserves and probable reserves and related future net revenue as at June 30, 2010, estimated using forecast prices and costs.
2. The Reserves Data are the responsibility of the Company's management. Our responsibility is to express an opinion on the Reserves Data based on our evaluation.

We carried out our evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the "COGE Handbook"), prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).

3. Those standards require that we plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions presented in the COGE Handbook.
4. The following table sets forth the estimated future net revenue attributed to proved plus probable reserves, estimated using forecast prices and costs on a before tax basis and calculated using a discount rate of 10 percent, included in the reserves data of the Company evaluated by us as of June 30, 2010, and identifies the respective portions thereof that we have audited, evaluated and reviewed and reported on to the Company's management and Board of Directors:

Independent Qualified Reserves Evaluator or Auditor	Description and Preparation Date of Evaluation Report	Location of Reserves (Country)	Net Present Value of Future Net Revenue Before Income Taxes (10% Discount Rate)			
			Audited (US\$)	Evaluated (US\$)	Reviewed (US\$)	Total (US\$)
MKM Engineering	Appraisal of Certain Oil and Gas Properties Owned by Gale Force Petroleum, Inc. Located in Oklahoma, Tennessee, and Texas As of June 30, 2010	USA		25,188,010		25,188,010
Total				25,188,010		25,188,010

5. In our opinion, the reserves data evaluated by us have, in all material respects, been determined and are presented in accordance with the COGE Handbook.
6. We have no responsibility to update the report referred to in paragraph 4 for events and circumstances occurring after its preparation date.
7. Because the reserves data are based on judgments regarding future events, actual results will vary and the variations may be material. However, any variations should be consistent with the fact that reserves are categorized according to the probability of their recovery.

Executed as to our report referred to above:

REPORT OF MANAGEMENT AND DIRECTORS ON OIL AND GAS DISCLOSURE

Management of Gale Force Petroleum Inc. (the "Company") is responsible for the preparation and disclosure of information with respect to the Corporation's oil and gas activities in accordance with securities regulatory requirements. This information includes reserves data which are estimates of proved reserves and probable reserves and related future net revenue as at June 30, 2010, estimated using forecast prices and costs.

An independent qualified reserves evaluator has evaluated the Corporation's reserves data. The report of the qualified reserves evaluator is presented below.

The Reserves Committee of the board of directors has

- (a) reviewed the Corporation's procedures for providing information to the independent qualified reserves evaluator;
- (b) met with the independent qualified reserves evaluator to determine whether any restrictions affected the ability of the independent reserves evaluator to report without reservation; and
- (c) reviewed the reserves data with management and the independent qualified reserves evaluator.

The Reserves Committee of the Board of Directors has reviewed the Corporation's procedures for assembling and reporting other information associated with oil and gas activities and has reviewed that information with management. The Board of Directors has, on the recommendation of the Reserves Committee, approved

- a) the content and filing with securities regulatory authorities of Form 51-101F1 containing reserves data and other oil and gas information;
- b) the Company not filing Form 51-101F2 which is the report of the independent qualified reserves evaluator on the reserves data because the Corporation has no reserves; and
- c) the content and filing of this report.

Because the reserves data are based on judgements regarding future events, actual results will vary and the variations may be material. However, any variations should be consistent with the fact that reserves are categorized according to the probability of their recovery.
