51-102F3 Material Change Report [F]
Published December 29, 2006
Effective December 29, 2006

Item 1 Name and Address of Company

Quadro Resources Ltd.
Suite 1030 - 789 W Pender Street
Vancouver, B.C., V6C 1H2

Item 2 Date of Material Change

July 10 2013

Item 3 News Release

The news release dated July 10, 2013 was disseminated through Canada Stockwatch and Market News under section 7.1 of National Instrument 51-102.

Item 4 Summary of Material Change

Please refer to attached news release.

Item 5 Full Description of Material Change

5.1 Full Description of Material Change

Please refer to attached news release

5.2 Disclosure for Restructuring Transactions

N/A

Item 6 Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

N/A

Item 7 Omitted Information

N/A

Item 8 Executive Officer

T. Barry Coughlan, Executive Chairman, (604) 683-3331

Item 9 Date of Report

July 11, 2013

QUADRO RESOURCES CORP. ANNOUNCES AMENDED OPTION AGREEMENT

VANCOUVER, BC July 10, 2013 – Quadro Resources Corp. (TSX-V: QRO) ("Quadro" or the "Corporation") is pleased to announce that it has entered into an amendment agreement (the "Amending Agreement") in respect to the mineral property option agreement dated February 19, 2013 with Vatic Ventures Corp. ("Vatic") previously announced on March 1, 2013 whereby Quadro can acquired a 51% interest in and to certain mineral claims known as the Brookmere Property (the "Property") located in the Spences bridge Gold Belt District, British Columbia, Canada (the "Transaction").

Pursuant to the terms of the Amending Agreement Quadro may acquire a 51% interest in the Property by completing the following exploration expenditures ("Expenditures") on the Property:

1) $110,000 of Expenditures by April 30, 2014
2) A further $250,000 of Expenditures by April 30, 2015; and
3) A further $500,000 of Expenditures by April 30, 2016.

Brookmere Property Highlights

The Property consists of 14 claims totaling 7,176 hectares and is located near the southern end of the Spences Bridge Gold Belt (SBGB), approximately 30 km south of Merritt, British Columbia. The Property is accessible by the Coquihalla Highway (BC Provincial Highway #5) at the Coldwater exit. The mining claims that comprise the Property cover prospective stratigraphy in the south SBGB, a 110 km northwest-trending belt of intermediate to felsic volcanic rocks dominated by the Cretaceous Spences Bridge group. These relatively underexplored volcanic rocks are highly prospective for epithermal style gold mineralization.

Vatic Ventures Corp. recently completed a two phase exploration program on the Property. Phase I consisted of road soil sampling, rock sampling and silt or stream sediment sampling. A total of 35 rock samples and 2,636 soil samples were taken over a 2,600 m by 2,700 m grid with 100 m lines sampled at every 25 m in the northern part of the 7,000 ha large property. Two target areas were identified for follow up: Target 1 in the east central portion of the Property and Target 2 (North Target Area) in the northern end of the Property. Phase II consisted of a 2600 metre by 2500 metre follow up soil grid on Target 1 at 100 metre lines by 25 metre sample intervals. Additional rock sampling was also completed as part of the Phase II program, following up on the Phase I soil anomalies.

The Phase I program was successful in locating continuous to semi-continuous areas of anomalous soil values from roads cutting through the two target areas. However, soil grid was established over Target Area 1 because of wider spread road soil mineralization, anomalous stream sediment geochemistry from the creek draining the area and the presence of an 11,260 ppb Au float sample in the area.

Sampling on the 2011 soil grid was successful in locating a 900 metre to 2000 metre long by 25 metre to 50 metre wide multi-element anomaly on the east central portion of the grid. A sample of rounded rhyolite quartz breccia float in the area returned 97.3 ppb Au.

The 2013 work program will continue the exploration of the Brookmere Property to further evaluate its potential by completing prospecting, mapping and soil grid in the Target 2 area which will result in the collection of approximately 1,200 soil samples and based on results to commence trenching and diamond drilling.

On Behalf of the Board of Directors
T.B. Coughlan
