# Arkansas Bar Association Chooses Identillect's Delivery Trust<sup>®</sup> for Member's Secure Email Communications

**The Arkansas Bar Association sets precedence as one of the first state bar associations to take proactive action to combat cyber-crime in selecting Delivery Trust<sup>®</sup> as the official email security provider for the Bar**

**Irvine, CA** – Dec 20, 2017 – Identillect Technologies Corp. (the "Company" or "Identillect") (TSX-V: ID, OTCQB: IDTLF, Frankfurt: 8ID), announces today the Arkansas Bar Association (the "Bar") has selected Delivery Trust<sup>®</sup> as the preferred solution for all association members to meet and exceed the regulatory requirements to protect their client and member sensitive communications. Identillect has seen growth over the past several years with many law firms as the legal community has become more concerned about cyber security attacks across the United States.

The Arkansas Bar Association has focused on ensuring their members possess the education and tools needed to best serve their clients and represent the Arkansas legal community to the best of their ability. In this tradition the Bar has taken a progressive stance on security. They wanted to be one of the first bar associations in the United States to actively seek out a relationship with a security provider to optimize cyber-security education and provide an avenue for secure communication. After actively reviewing many different products the Arkansas Bar Association chose Identillect's Delivery Trust<sup>®</sup> as the security system to be offered to its members as part of their select member benefit package.

Brian Rosenthal, Co-Chairman of the Bar's Member Benefits Committee commented, "As a representative of the board it has been important that the Bar take an active role in educating our members about cyber security threats as well as making security products readily available. As the Bar researched security solutions, it selected Identillect's Delivery Trust. We believe our members will find value in the Delivery Trust system as it is known in the industry as being secure and simple to use, while maintaining a high level of administrative controls."

According to LogicForce's Law Firm Cyber Security Scorecard, 40% of surveyed law firms were not aware they were breached in 2016 ([cyber-attacks-espionage/hackers-are-aggressively-](#)

[targeting-law-firms](#)). This highlights a true need for not only tools to combat cyber threats, but also increased awareness and education surrounding digital communication channels.

Identillect CEO Todd Sexton states, “The legal community has become a target for cyber criminals in recent years. The best way to combat being a target is to educate and deploy security protocols to minimize the chances of experiencing a data breach. Identillect is proud to be the selected security provider for the Arkansas Bar Association. We see this as a true partnership as we will work to continually educate the Arkansas legal community as to changing regulations, current cyber security threats and providing the best tools to protect sensitive electronic communications.”

### **About Arkansas Bar Association**

The Arkansas Bar Association, established in 1898, is a voluntary, statewide organization with more than 5,500 members. Among its purposes are the advancement of the administration of justice and the fostering among its member of high ideals of integrity, learning and public service.
