MANGANESE INC.**

*A Critical Metal Company Focusing on
Recycling Lithium Ion Electric Vehicle Batteries*

AMERICAN MANGANESE INC. INVITED TO PRESENT AT THE 22ND INTERNATIONAL CONGRESS FOR BATTERY RECYCLING ICBR SEPTEMBER 20-22, 2017 IN LISBON, PORTUGAL

August 23, 2017 - Vancouver, BC

Larry W. Reaugh, President and Chief Executive Officer of **American Manganese Inc.** (“American Manganese” or “AMI” or the “Company”), (TSX.V: AMY; Pink Sheets: AMYZF; Frankfurt: 2AM), is pleased to announce that the Company and Kemetco Research Inc. will be presenting on advanced battery recycling for lithium ion battery cathode metal recovery and reuse at the 22nd International Congress for Battery Recycling - <http://www.icm.ch/icbr-2017> (“ICBR”) Conference on September 21st, 2017 in Lisbon, Portugal. The ICBR is the international platform for discussion of the latest developments and the challenges of battery recycling, bringing together many decision makers in the battery recycling chain such as battery producers, recyclers, collection schemes, policy-makers, transport companies and many more.

The conference will be attended by Mr. Norman Chow, President of Kemetco Research Inc., and Mr. Larry Reaugh, President and Chief Executive Officer of American Manganese Inc. Mr. Chow will make a technical presentation about American Manganese Inc.’s patent pending process for recycling cathode metals such as lithium, cobalt and nickel from spent electric vehicle lithium ion batteries.

“The Company is honored to be invited to its third major technical presentation for its proprietary lithium ion electric vehicle battery recycling process technology. AMI is being recognized as a significant potential player in the supply of cathode metals, specifically cobalt, which is in short supply and currently trading at (US) \$60,000/tonne,” says Mr. Reaugh.

About American Manganese Inc.

American Manganese Inc. is a diversified specialty and critical metal company focused on capitalizing on its patented intellectual property through low cost production or recovery of electrolytic manganese products throughout the world, and recycling of spent electric vehicle lithium ion rechargeable batteries.

Interest in the Company's patented process has adjusted the focus of American Manganese Inc. toward the examination of applying its patented technology for other purposes and materials. American Manganese Inc. aims to capitalize on its patented technology and proprietary know-how to become the industry leader in recycling spent electric vehicle lithium ion batteries with cathode chemistries such as: Lithium-Cobalt, Lithium-Cobalt-Nickel-Manganese, and Lithium-Manganese ([Please see the Company's July 27, 2017 press release for further details](#)).

The company has updated their PowerPoint which can be viewed [here](#).

About Kemetco Research Inc.

[Kemetco Research](#) is a private sector integrated science, technology and innovation company. Their Contract Sciences operation provides laboratory analysis and testing, field work, bench scale studies, pilot plant investigations, consulting services, applied research and development for both industry and government. Their clients range from start-up companies developing new technologies through to large multinational corporations with proven processes.

They provide scientific expertise in the fields of Specialty Analytical Chemistry, Chemical Process and Extractive Metallurgy. Because Kemetco carries out research in many different fields, it is able to offer a broader range of backgrounds and expertise than most laboratories.
