

AMERICAN MANGANESE INC.

*A Critical Metal Company Focusing on
Recycling Lithium Ion Electric Vehicle Batteries*

AMERICAN MANGANESE INC. TO PRESENT AT THE MONEYSHOW SAN FRANCISCO, CA - AUGUST 23 - 25, 2018

August 15, 2018 - Surrey, BC

Larry W. Reaugh, President and Chief Executive Officer of American Manganese Inc. (“American Manganese” or “AMY” or the “Company”), (TSX.V: AMY; OTC-US: AMYZF; FSE: 2AM), is pleased to announce that the Company will be presenting on their advanced lithium ion battery recycling technology at The MoneyShow San Francisco August 23 - 25, 2018 | Hilton San Francisco Union Square San Francisco, CA. The Company also has booth #514 for shareholders and investors to meet the management.

The conference will be attended by Mr. Larry Reaugh, who will be making a presentation about American Manganese Inc.’s patent pending process for recycling 100% of cathode metals such as lithium, cobalt, nickel, manganese and aluminum from spent electric vehicle lithium ion batteries. Zarko Meseldzija, Chief Technical Officer of American Manganese Inc., will also be in attendance.

“The Company is honored to present its proprietary lithium ion electric vehicle battery recycling process opportunity. AMY is being recognized as a significant potential player in the supply of cathode metals, specifically cobalt, which is in short supply and presently trading at over US\$64,000/tonne”, says Mr. Reaugh.

About American Manganese Inc.

American Manganese Inc. is a diversified specialty and critical metal company focused on capitalizing on its patented intellectual property through low cost production and recovery of electrolytic manganese products throughout the world, and recycling of spent electric vehicle lithium ion rechargeable batteries.

Interest in the Company's patented process has adjusted the focus of American Manganese Inc. toward the examination of applying its patented technology for other purposes and materials. American Manganese Inc. aims to capitalize on its patented technology and proprietary know-how to become the industry leader in recycling spent electric vehicle lithium ion batteries and recovering 100% of the cathode metals such as: Lithium-Cobalt, Lithium-Cobalt-Nickel-Manganese, Lithium-Cobalt-Aluminum and Lithium-Manganese ([Please see the Company's July 25, 2018 Business Plan for further details](#)).
