## **American Manganese Inc. Reports Pilot Plant Results of 99.94% Purity from Recovered NCA Cathode Material**

### ***RecycLiCo™ Pilot Plant Prepares for Stage 5 Testing to Recover Lithium Carbonate and Recycle Process Reagents and Water***

August 27, 2019 - Surrey, BC

TSX.V: AMY | OTC US: AMYZF | FSE: 2AM

American Manganese Inc. ("AMY" or the "Company"), is pleased to announce analytical results from the Company's independent contract lab, Kemetco Research, an integrated science, technology and innovation company.

Using the Company's patented RecycLiCo™ process, Kemetco attained 99.94% purity from the [recovered NCA cathode material](#). The material was tested in stages 3 and 4 of the RecycLiCo™ pilot plant project.

Following the NCA cathode precursor purity results and [previously achieved 99.93% purity](#) from NMC cathode material, the Company is preparing to enter the final stage (stage 5) of the RecycLiCo™ pilot plant project for the recovery of battery-grade lithium carbonate and the recycling of process reagents and water.

"Kemetco's expertise in development of hydrometallurgical processes has enabled them to meet their goals and the Company's expectations during all stages of the pilot plant project. We are excited to close the loop on our patented process as the final stage of the project approaches," said Larry Reaugh, President and CEO of American Manganese.

#### **[About Kemetco Research Inc.](#)**

Kemetco Research is a private sector integrated science, technology and innovation company. Their Contract Sciences operation provides laboratory analysis and testing, field work, bench scale studies, pilot plant investigations, consulting services, applied research and development for both industry and government. Their clients range from start-up companies developing new technologies through to large multinational corporations with proven processes.

Kemetco provides scientific expertise in the fields of Specialty Analytical Chemistry, Chemical Process and Extractive Metallurgy. Because Kemetco carries out research in many different fields, it can offer a broader range of backgrounds and expertise than most laboratories.

## [About American Manganese Inc.](#)

American Manganese Inc. is a critical metals company focused on the recycling of lithium-ion batteries with the [RecycLiCo™ Patented Process](#). The process provides high extraction of cathode metals, such as lithium, cobalt, nickel, manganese, and aluminum at battery grade purity, with minimal processing steps. American Manganese Inc. aims to commercialize its breakthrough RecycLiCo™ Patented Process and become an industry leader in recycling cathode materials from spent lithium-ion batteries.
