EV TECHNOLOGY GROUP COMPANY, MOKE FRANCE, PARTNERS WITH GOMECANO TO OFFER ON-DEMAND AFTER-SALES SERVICES TO ALL ELECTRIC MOKE DRIVERS IN FRANCE

TORONTO, ON (29 JUNE, 2022) – EV Technology Group Ltd. (the "**Company**" or "**EV Technology Group**") (NEO: EVTG, DE: B96A) announces today that its wholly owned subsidiary MOKE France SAS ("**MOKE France**") has partnered with GOMECANO, a company offering on-demand mobile mechanics to perform automotive repairs.

MOKE France's partnership with GOMECANO offers Electric MOKE owners the opportunity to have access to on-demand mechanics for vehicle repairs in just a few simple steps, from the comfort of their home or office. The nationally recognized on-demand vehicle servicing company offers high-end customer service and has many highly qualified mechanics, making GOMECANO the perfect partner for keeping the Electric MOKE vehicles on the road, for general maintenance and any required repair.

The Electric MOKE is known for its iconic design and versatility when travelling across different terrains, making it the perfect vehicle for warmer climates such as the French Riviera. MOKE France selected GOMECANO as its go-to after-sales service provider, due to their expertise in servicing electric vehicle engines, customer satisfaction levels, and modern service offering that improves upon the traditional model of vehicle repairs.

As the mechanic industry adapts to electric vehicles ("**EVs**"), and notably the lower EV engine failure rates compared to Internal Combustion Engine (ICE) vehicles, it is still necessary to regularly service any vehicle on the road and have a quick and conveniently available solution should any repair be required.

"As demand shifts over time from ICE mechanics to electric vehicle mechanics, entire workforces will be required to re-skill to adapt to the EV revolution," said Wouter Witvoet, CEO and Founder of EV Technology Group. "We are delighted to be working with GOMECANO as our customers expect state-of-the-art service in line with our technologically advanced brand. It is very important that these vehicles receive the care and attention required to keep them running smoothly, to give them a long and risk-free life."

Alexandre Nivesse (GOMECANO, co-founder), Willy Gruyelle (MOKE France, CEO), Mathias Boutsen (GOMECANO, co-founder)

"Many of our customers are enjoying the use of their Electric MOKE while on their vacation, and they expect a technology-enabled mechanic service that doesn't become a bother when having to organise any repairs," said Willy Gruyelle, CEO of MOKE France. "With GOMECANO, we've selected a team of after-sales experts with deep industry knowledge, electric car certifications and a national footprint. Their speedy services are offered to owners of our new Electric MOKE, which definitely adds a layer of comfort and security to those purchasing our vehicles," added Gruyelle.

"We are delighted at the prospect of working on exceptional and iconic cars like MOKE. Besides the fun factor, they are very well-made and robust cars that require expert attention. We are pleased that MOKE has chosen our team of qualified mobile mechanics to take care of their little treasures wherever the adventure takes them," said Alexandre Nivesse, CEO of GOMECANO.

GOMECANO vehicles ready to service the new Electric MOKE

EV Technology Group
EV Technology Group was founded in 2021 with the vision to electrify iconic brands – and the mission to redefine the joy of motoring for the electric age. By acquiring iconic brands and bringing beloved motoring experiences to the electric age, EV Technology Group is driving the EV revolution forward. Backed by a diversified team of passionate entrepreneurs, engineers and driving enthusiasts, EV Technology Group creates value for its customers by owning the total customer experience — acquiring and partnering with iconic brands with significant growth potential in unique markets, and controlling end-to-end capabilities. Forward-Looking Information

This news release contains forward-looking statements including, but not limited to: MOKE France's partnership with GOMECANO, GOMECANO and its after-sales service, adoption of EVs, MOKE France and EV Technology Group's operations, expectations, and future actions. Often, but not always, these Forward-looking Statements can be identified by the use of words such as "estimated", "potential", "open", "future", "assumed", "projected", "used", "detailed", "has been", "gain", "planned", "reflecting", "will", "containing", "remaining", "to be", or statements that events, "could" or "should" occur or be achieved and similar expressions, including negative variations.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any results, performance or achievements expressed or implied by the Forward-looking Statements, including those factors discussed under "Risk Factors" in the filing statement of the Company. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in Forward-looking Statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended.

Forward-looking statements involve significant risk, uncertainties and assumptions. Many factors could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking statements. These factors should be considered carefully and readers should not place undue reliance on the forward-looking statements. Although the forward-looking statements contained in this news release are based upon what management believes to be reasonable assumptions, the Company cannot assure readers that actual results will be consistent with these forward-looking statements. The forward-looking statements contained herein are made as of the date hereof and the Company disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except where required by law. There can be no assurance that these forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.
