

## **EUROTECH: CONSOLIDATED INTERIM MANAGEMENT REPORT AS AT 30 SEPTEMBER 2023 APPROVED BY THE BOD**

*The nine months show revenues in line with the previous year on a like-for-like basis and up due to the contribution of InoNet, a first margin improved by 250bps YoY, and adjusted EBITDA more than doubled. Net working capital and net financial position improved compared to figures as of June 30, 2023.*

### **Amaro (Italy), 14 November 2023**

- Consolidated revenues of € 70.0 million (€ 59.8 million as at 30.09.2022, +45.6% at constant exchange rates)
- Consolidated gross profit of € 33.1 million and 47.3% of revenues (€ 26.8 million and 44.8% of revenues as at 30.09.2022)
- Consolidated EBITDA of € 3.8 million (€ 0.5 million as at 30.09.2022)
- Consolidated EBIT of € -0.5 million (€ -3.2 million as at 30.09.2022)
- Group net income of € -1.2 million (€ -3.7 million as at 30.09.2022)
- Net debt of € 18,03 million (€ 14.42 million as at 31.12.2022)

The Board of Directors of Eurotech S.p.A. today examined and approved the consolidated results as at 30 September 2023.

### ***Trend of the period***

On a like-for-like basis, revenues for the nine months of 2023 were in line with those for the nine months of the previous year. The distribution of revenues among the first three quarters was significantly different this year than last year, as the first two quarters of 2022 had been negatively impacted by the electronic component shortage phenomenon, which had led to a buildup of outstanding orders, most of which were then delivered during the third quarter. In contrast, the third quarter of this year was impacted by the phenomenon of destocking, a common phenomenon in our industry and related to three factors: 1. gradual normalization of the availability of electronic components, which is allowing over-accumulated inventories to be reduced; 2. rising interest rates that make inventory cost more and urge a reduction in immobilized values; and 3. uncertainty about the global scenario, which leads companies to be more conservative in releasing orders beyond what is strictly necessary.

Including the contribution of InoNet, which entered the scope of consolidation in September 2022, revenues for the nine months show an increase of 17.0% at historical exchange rates, which becomes 21.9% at constant exchange rates.

The Edge AIoT business continues to play a decisive role in the growth outlook as envisioned by the company's new strategic direction: on a like-for-like basis, the Edge AIoT business showed significant organic growth of 86% over the nine months of 2022; including the contribution of InoNet, the overall year-on-year revenue growth in Edge AIoT rises to over 200%.

Difficulties in sourcing electronic components have drastically decreased from a year ago, and remain only for some very specific and niche type of components in use in our products in Japan. The improved scenario, together with actions taken to counter the effects of the component shortage, resulted in a 250bps improvement in the first margin over the nine months of 2022.

In the first few months of the year we witnessed a reduction in the delivery time of the components themselves, which, for some items, were made available well in advance of the initial scheduled delivery, which had the effect of temporarily accumulating stock in the inventory. This phenomenon had a negative impact on net working capital and, consequently, on the net financial position at the end of June. The figure at the end of September shows a reversal of the trend, with an initial improvement in both the value of working capital and the net financial position.

### ***Economic performance of the Eurotech Group***

At **equal perimeter, revenues** in the nine months of 2023 were €56 million as well as in the nine months of 2022, considering constant exchange rates. Including InoNet's contribution, total revenues were €70.01 million compared to €59.82 million in the nine months of 2022. The 17% increase at historical exchange rates would correspond to a 21.9% increase at constant exchange rates.

With reference to the breakdown of revenues by location of the Group's activities, Europe has become the most significant area and recorded a 42.8% contribution to the Group's revenues (in the nine months of 2022 it was 21.7%); the U.S. area is in second place and contributed 31.6% of total revenues (in the nine months of 2022 it was 44.3%); in third place is the

Japanese area, which recorded a 25.6% contribution to the total figure (in the nine months of 2022 it was 34.1%).

The U.S. area suffered a decline in traditional Embedded business related to the destocking phenomenon. The European area achieved organic growth driven by the Edge AIoT business and also benefited from the effect of the consolidation of InoNet. The Japanese region, on the other hand, experienced a decline partly due to the effect of destocking and partly due to the different distribution of orders from its main local customers in the different quarters of the year.

The **first margin** for the period was 47.3% of sales, up sharply from a margin of 44.8% in the first nine months of 2022. Compared with the first six months of the year, the margin improvement was 70 bps, thanks to a margin in the third quarter at 48.8%. The improvement in the first margin was mainly the result of actions to stabilize purchasing costs and the almost complete disappearance of price anomalies on low availability components, which had led to significant Purchase Price Variations (PPV) in 2022, which had a dilutive effect on the first margin.

**Operating costs** before adjustments made and net of nonrecurring costs (by the way, only accounted for in 2022) amounted to €31.95 million in the first nine months of 2023, compared to €27.48 million in the first nine months of 2022. The increase is mainly due to costs resulting from InoNet's different contribution to the consolidation, which was one month in the three-month period as of September 30, 2022 and the full nine months for 2023. At historical exchange rates, this shows a total increase of 16.3%, which net of InoNet's higher costs comes to only 1.3%.

**EBITDA** amounted to €3.80 million (5.4% of revenues), compared to €0.49 million in the nine months of 2022 (0.8% of revenues). Taking into account non-recurring costs in 2022 alone, adjusted EBITDA in the first nine months of 2022 amounted to €1.41 million (2.4% of revenues).

**EBIT**, or operating income for the period, was € -0.51 million (-0.7% of revenues), compared to €-3.17 million for the nine months of 2022 (-5.3% of revenues). Taking into account nonrecurring costs in 2022 alone, adjusted EBIT for the first nine months of 2022 amounted to € -2.25 million (-3.8% of revenues).

In terms of **Group net income**, the figure for the first nine months was €-1.23 million (-1.8% of revenues), while it was €-3.74 million in the same period of 2022 (-6.3% of revenues).

### ***Balance sheet and financial situation of the Eurotech Group***

As of September 30, 2023, the Group had **net financial debt** of €18.03 million, compared to an amount of €14.42 million as of December 31, 2022. The change in the net financial position resulted from both the use of cash to support the increase in working capital in the amount of €2.54 million and the repayment of loans.

**Net working capital** amounted to 22.49 million euros as of September 30, 2023, compared to €19.94 million as of December 31, 2022. The growth in working capital is related to both the dynamics of collections and payments and the trend in inventories needed to generate fourth quarter sales.

It should be noted, however, that the values of both net working capital and net financial debt are improving from the values recorded at the end of June. The ratio of net working capital to pro forma sales for the last 12 rolling months stands at 21.5%.

**Group shareholders' equity** amounts to €99.1 million (€106.5 million as of December 31, 2022).

### ***Foreseeable evolution of operations***

In the last quarter of the year, the transformation journey in the strategic direction set out towards the Edge AIoT will go on.

We will continue to monitor the scenario and external events that could affect our business: not only the destocking phenomenon, but also geopolitical tensions in different regions of the world and the evolution of the conflict in the Middle East.

As far as can be foreseen to date, the fourth quarter will be stronger than the third, in line with the typical trend historically recorded.

Initiatives to manage and keep procurement costs under control are having the desired effects, and the indicators that management monitors suggest that the first margin as a percentage of

revenues will maintain values close to those recorded for the nine months in the final quarter as well.

In accordance with the fulfillment of backlog orders, a gradual consumption of the extra stocks of components accumulated during the shortage is also expected, resulting in a reduction in the value of the inventory of about €3 million at constant exchange rates, which will benefit both working capital and the net financial position.
