The Issuer announces the commencement of work on the Fiebre De Oro Properrty.

Item 5. **Full Description of Material Change**

The Issuer is pleased to announce the commencement of the work program on the Fiebre de Oro Gold & Silver Property. The work program will begin the week of March 21, 2005.

This work program will consist of geological mapping and sampling of the vein systems known to occur on the 1,700 hectare property. The program will be conducted for the Issuer under the supervision of William S. Hamilton, P. Geo, Manager of exploration for MacMillan Gold Corp. and a Qualified Person.

The gold-bearing veins on the property have been subjected to small scale mining for over 100 years and have been known since pre-Mexican revolutionary times.

The initial focus of the work will be a structural corridor extending from the Upper Breccia Zone in the northwest to the Madronio target in the southeast. Previous work by MacMillan Gold Corp. indicated that this corridor has at least three gold bearing zones occurring within a 100 metre width and traceable over a strike length of 1,000 metres.

By agreement with MacMillan Gold Corp., the Issuer has the option to earn a 50% interest in the Fiebre de Oro Property (for details see News Releases November 15 and December 23, 2004) located in the State of Jalisco, Mexico. he Issuer is the operator of the Property with MacMillan being the exploration managers until completion of the Issuer earning its interest. The Issuer has already paid US$55,000 to MacMillan representing the first year's work commitment under the agreement.
