FORM 51-102F3
MATERIAL CHANGE REPORT

Item 1: Name and Address of Company

Gold World Resources Inc. (“**Gold World**” or the “**Company**”)
1200 – 330 Bay Street,
Toronto, Ontario, M5H 2S8
Canada

Item 2: Date of Material Change

January 18, 2012

Item 3: News Release

January 18, 2012 the News Release was released to the Canadian News Wire Group and through various others approved public media and filed on SEDAR with the TSX Venture Exchange and the securities commissions of British Columbia, Alberta and Ontario.

Item 4: Summary of Material Change(s)

TORONTO, January 18, 2012, Gold World Resources Inc. (TSXV: GDW) or ("the "Company") is pleased to present excerpts of the recently filed NI43-101 Technical Report on the Mt. Anderson Project (see press release January 17, 2012).

The latest field program by Gold World Resources Inc. has been conducted in a systematic, comprehensive and technically responsible manner. Results indicate that the claim group is a property of merit and certainly deserves additional exploration with the immediate objective of confirming the presence of one or more gold-silver deposits warranting definition by subsequent drilling.

While the geology in China still presents a number of very interesting options, the regulatory and ownership regime resulted in a pace of development that was not satisfactory to management. The Company curtailed expenses in China and has now withdrawn from China. All money from the latest financing in May 2011 went towards the Mt. Anderson Project.

Item 5: Full Description of Material Change

TORONTO, January 18, 2012, Gold World Resources Inc. (TSXV: GDW) or ("the "Company") is pleased to present excerpts of the recently filed NI43-101 Technical Report on the Mt. Anderson Project (see press release January 17, 2012).

Press Release

Gold World Resources reports on the NI43-101 Technical Report on the Mount Anderson Yukon Project

TORONTO, January 18, 2012, Gold World Resources Inc. (TSXV: GDW) or ("the "Company") is pleased to present excerpts of the recently filed NI43-101 Technical Report on the Mt. Anderson Project (see press release January 17, 2012). Excerpts from the Summary section read:

*"**The latest field program by Gold World Resources Inc. has been conducted in a systematic, comprehensive and technically responsible manner. Results indicate that the claim group is a property of merit and certainly deserves additional exploration with the immediate objective of confirming the presence of one or more gold-silver deposits warranting definition by subsequent drilling**".*

"Recommendations

- After the aeromagnetic and radiometric reports are interpreted and the MMI^{TM} soil sample data evaluated, a comprehensive drilling program should test the strong anomalies for Au-Ag-As (A) to the NW of the adits, Au-Ag-Pb-Zn (B) and Au-Ag-Pb (F) along the west slope of Mt. Anderson.
- Access roads should be made to reach both the lower and upper adits so the adits can be rehabilitated and sampled to assess economic potential.
- If possible, as the road is being built, drill sites should be located on the access road so the high grade but erratic galena with very high silver concentration can be evaluated at depth.
- A series of shallow to medium depth cored holes should be drilled along the magnetic low between Trench 47 and the Adanac Trench to test several strong nodes in the gold-silver Anomaly C which were not trenched by past explorers.
- Trench and/or drill the strong 800-m antimony soil anomaly (E) south of the Fleming skarn.
- Complete the soil MMI^{TM} survey over the remainder of the current block of 163 claims.
- Complete a detailed examination of all the 2011 data and the new data that will be available in 2012 over the claim block to see if there are other potential drill targets."

The Company is pleased to have focused its exploration activities during 2011 on the Mt. Anderson Project.
While the geology in China still presents a number of very interesting options, the regulatory and ownership regime resulted in a pace of development that was not satisfactory to management. The Company curtailed expenses in China and has now withdrawn from China. All money from the latest financing in May 2011 went towards the Mt. Anderson Project.

The Company intends to strengthen its in-house manpower in 2012 to meet the new demands and increased needs of the Mt. Anderson Project. In addition, the Company continues to investigate other opportunities on an ongoing basis.

I like to take this opportunity to thank the Board of Directors who worked diligently with me on the Company's projects as well as reviewing and evaluating new properties where their international experience and expertise has been invaluable. In their support of the Company they show an impeccable record of attending the numerous meetings.

About the Company:
The Company is a precious- and base-metals exploration company focusing on the Mount Anderson Yukon gold/silver, polymetallic Project.
The complete Technical Report is available on our website www.goldworldresources.com

ON BEHALF OF THE BOARD
"Hermann Derbuch",
