December 6, 2011

Abattis signs LOI to Acquire Nutra Research International Ltd.

Vancouver, BC – December 6, 2011

Abattis Biologix Corporation (CNSX: FLU) ("Abattis" or the "Company"), a specialty biotechnology company focused on developing, licensing and marketing a range of nutraceutical products, today announced that it has signed a Letter of Intent ("LOI") with Nutra Research International Ltd. ("Nutra"). This commences the process of conducting thorough due diligence and begins the creation of an agreement to acquire Nutra Research International. Under the terms of the LOI, the parties will evaluate and select an optimal deal structure with the objective of formalizing a definitive acquisition agreement that outlines their plans to create a powerful company that will offer cutting edge nutritional products.

"We are very pleased to be exploring this growth opportunity. Nutra Research is a synergistic business to ours and its acquisition offers a long standing history of revenue, distribution channels and a complimentary product portfolio," stated Mike Withrow, President and CEO of Abattis. "This initiative further validates our commitment to grow Abattis and commercialize our unique product line."

The parties have agreed to close the transaction on or before February 28 2012. This agreement with Nutra is in keeping with the plans of Abattis Biologix's expansion in order to create a powerful specialty biotechnology nutritional company that will be one to watch.

About Nutra Research International Ltd.

Nutra is a privately held, Richmond, BC-based natural health and wellness company. Nutra has developed a range of natural protective, skin, anti-aging, detox, and special relief cream products that utilize the company's proprietary Organic Plant Acids "OPA's". The company manufactures and sells to its loyal customer base that it has built over its long operating history.

About Abattis Biologix Corporation

Abattis Biologix Corporation is a specialty bio-technology life sciences company that has acquired intellectual property, conducts research, and works to develop proprietary health and wellness solutions that address chronic illnesses and disease in animals and humans
